

2012/08

Right here, we have countless book **2012/08** and collections to check out. We additionally allow variant types and in addition to type of the books to browse. The okay book, fiction, history, novel, scientific research, as capably as various supplementary sorts of books are readily friendly here.

As this 2012/08, it ends taking place being one of the favored book 2012/08 collections that we have. This is why you remain in the best website to look the amazing book to have.

Transcendence and Non-Naturalism in Early Chinese Thought Alexis

McLeod 2020-09-03 Contemporary scholars of Chinese philosophy often presuppose that early China possessed a naturalistic worldview, devoid of any non-natural concepts, such as transcendence. Challenging this presupposition head-on, Joshua R. Brown and Alexis McLeod argue that non-naturalism and transcendence have a robust and significant place in early Chinese thought. This book reveals that non-naturalist positions can be found in early Chinese texts, in topics including conceptions of the divine, cosmogony, and apophatic philosophy. Moreover, by closely examining a range of early Chinese texts, and providing comparative readings of a number of Western texts and thinkers, the book offers a way of reading early Chinese Philosophy as consistent with the religious philosophy of the East and West, including the Abrahamic and the Brahmanistic religions. Co-written by a philosopher and theologian, this book draws out unique insights into early Chinese thought, highlighting in particular new ways to consider a range of Chinese concepts, including tian, dao, li, and you/wu.

2013-04-09 MySQL Workbench Data Modeling and Development helps developers learn how to effectively use this powerful product for database modeling, reverse engineering, and interaction with the database without writing SQL statements. MySQL Workbench is a graphical user interface that developers can use to create and maintain MySQL databases without coding. The book covers the interface and explains how to accomplish each step by illustrating best practices visually

Distributed Fiber Optic Sensing and Dynamic Rating of Power Cables

Sudhakar Cherukupalli 2019-10-01 A guide to the physics of Dynamic Temperature Sensing (DTS) measurements including practical information about procedures and applications Distributed Fiber Sensing and Dynamic Ratings of Power Cable offers a comprehensive review of the physics of dynamic temperature sensing measurements (DTS), examines its functioning, and explores possible applications. The expert authors describe the available fiber optic cables, their construction, and methods of installation. The book also includes a discussion on the variety of testing methods with information on

the advantages and disadvantages of each. The book reviews the application of the DTS systems in a utility environment, and highlights the possible placement of the fiber optic cable. The authors offer a detailed explanation of the cable ampacity (current rating) calculations and examines how the measured fiber temperature is used to obtain the dynamic cable rating information in real time. In addition, the book details the leading RTTR suppliers, including the verification methods they used before their products come to market. Information on future applications of the DTS technology in other aspects of power system operation is also discussed. This important book:

- Explains the required calibration procedures and utility performance tests needed after the installation of a DTS system
- Includes information on the various practical aspects of communicating measured and computed quantities to the transmission system operator
- Reviews possible applications of the technology to fault location, vibration monitoring, and general surveying of land and submarine cable routes

Written for cable engineers and manufacturers, *Distributed Fiber Sensing and Dynamic Ratings of Power Cable* is an authoritative guide to the physics of DTS measurements and contains information about costs, installation procedures, maintenance, and various applications.

SAP BusinessObjects BI 4.0 The Complete Reference 3/E Cindi Howson 2012-10-22 The definitive reference for building actionable business intelligence—completely revised for SAP BusinessObjects BI 4.0. Unleash the full potential of business intelligence with fact-based decisions, aligned to business goals, using reports and dashboards that lead from insight to action. SAP BusinessObjects BI 4.0: The Complete Reference offers completely updated coverage of the latest BI platform. Find out how to work with the new Information Design Tool to create universes that access multiple data sources and SAP BW. See how to translate complex business questions into highly efficient Web Intelligence queries and publish your results to the BI

Launchpad. Learn how to create dashboards from data sourced through a universe or spreadsheet. The most important concepts for universe designers, report and dashboard authors, and business analysts are fully explained and illustrated by screenshots, diagrams, and step-by-step instructions. Establish and evolve BI goals Maximize your BI investments by offering the right module to the right user Create robust universes with the Information Design Tool, leveraging multiple data sources, derived tables, aggregate awareness, and parameters Develop a security plan that is scalable and flexible Design Web Intelligence reports from basic to advanced Create sophisticated calculations and advanced formatting to highlight critical business trends Build powerful dashboards to embed in PowerPoint or the BI Launchpad Use Explorer to visually navigate large data sets and uncover patterns

The Value Investors Ronald Chan 2012-08-06 Investing legend Warren Buffett once said that “success in investing doesn’t correlate with I.Q. once you’re above the level of 125. Once you have ordinary intelligence, what you need is the temperament to control the urges that get other people into trouble in investing.” In an attempt to understand exactly what kind of temperament Buffett was talking about, Ronald W. Chan interviewed 12 value-investing legends from around the world, learning how

their personal background, culture, and life experiences have shaped their investment mindset and strategy. The Value Investors: Lessons from the World’s Top Fund Managers is the result. From 106-year-old Irving Kahn, who worked closely with “father of value investing” Benjamin Graham and remains active today, and 95-year-old Walter Schloss (described by Warren Buffett as the “super-investor from Graham-and-Doddsville”), to the co-founders of Hong Kong-based Value Partners, Cheah Cheng Hye and V-Nee Yeh, and Francisco García Paramés of Spain’s Bestinvest Asset Management, Chan chose investment luminaries to help him understand the international appeal – and success – of value investing. All of these men became strong advocates of the approach despite considerable age and cultural differences. Chan finds out why. In The Value Investors, readers will also discover how these investors, each of whom has a unique value perspective, have consistently beaten the stock market over the years. Do they share a trait that allows this to happen? Is there a winning temperament that turns the ordinary investor into an extraordinary one? This book answers these questions and more.

Digital Discussions Natalie Jomini Stroud 2018-11-09 Big data raise major research possibilities for political communication scholars who are interested in how citizens, elites, and journalists interact. With the availability of social

media data, academics can observe, on a large scale, how people talk about politics. The opportunity to study political discussions is also available to media organizations and political elites—examining how they make use of big data represents another fruitful scholarly trajectory. The scholars involved in Digital Discussions represent forward thinkers who aim to inform the study of political communication by analyzing the behavior of and messages left by citizens, elites, and journalists in digital spaces. By using a variety of methodological approaches and bringing together diverse theoretical perspectives, this group sheds light on how big data can inform political communication research. It is critical reading for those studying and working in communication studies with a focus on big data.

Refrigerators and Freezers Lidija Pritržnik 2012

The Jefferson Lies David Barton 2012 "Thomas Jefferson stands falsely accused of several crimes, among them infidelity and disbelief. Noted historian David Barton now sets the record straight. Having borne the brunt of a smear

campaign that started more than two centuries ago, the reputation and character of American president Thomas Jefferson shows considerable tarnish, as lies and misunderstandings have gathered on his legacy. Noted early-America historian David Barton scours out the truth. Jefferson and Sally: Did he really have children by his slave, Sally Hemings? Jefferson and Jesus: Did he really abandon the faith of his family? Jefferson and the Bible: Did he really want to rewrite the Scripture? Jefferson and the church: Did he really advocate separation? Jefferson and slaves: What is the truth about his slaveholding and his statements that all are created equal? Jefferson and education: Did Jefferson really found the first secular, irreligious university? All of these questions deserve the cleansing light of truth. Barton has gone through the historical records, combed the original documents and letters, and examined the recent evidence, and his findings will upset the establishment. Barton shows the true man, the real Thomas Jefferson. Most readers will have the joy and surprise of meeting him for the very first time"--
