Identity Crisis John Sides 2019-08-13 A gripping in-depth look at the presidential election that stunned the world Donald Trump's election victory resulted in one of the most unexpected presidencies in history. Identity Crisis provides the definitive account of the campaign that seemed to break all the political rules—but in fact didn't. Featuring a new afterword by the authors that discusses the 2018 midterms and today's emerging political trends, this compelling book describes how Trump's victory was foreshadowed by changes in the Democratic and Republican coalitions that were driven by people's racial and ethnic identities, and how the Trump campaign exacerbated these divisions by hammering away on race, immigration, and religion. The result was an epic battle not just for the White House but about what America should be.

Pleiadian Earth Energy Astrology Pia Orleane 2018-11-06 Discover how to navigate the spiral energy patterns of the Universe for spiritual advancement and conscious evolution • Explains how the cycles of the 13 spirals of Universal energy and the 20 spirals of Earth energy interact on each calendar day as well as provides a Pleiadian perspective on how they influence us and the events in our lives • Offers practical examples of how you can consciously use the energies prevalent on a given day to your personal, spiritual benefit • Shares cosmic wisdom teachings from the Pleiadian group known as Laarkmaa Modern science has finally confirmed an essential component of the Pleiadian teachings: Our Universe is not linear; it moves in spirals. Human evolution also unfolds in spirals, rather than the linear progression we call “progress.” Sharing the cosmic wisdom teachings they have received from the Pleiadian group known as Laarkmaa, authors Pia Orleane and Cullen Baird Smith reveal a new system of Pleiadian-Earth energy astrology centered on the spiraling and interconnected movement of Universal and Earth energies, rather than on time, and explain how this new wave of Pleiadian wisdom can support human evolution. The authors identify two major spiral patterns that influence us: the 13 spirals of Universal energy that reflect cosmic laws and cosmic truth and the 20 spirals of Earth energy that reflect how humans experience themselves, each other, and their environment. They explain the dominant energy of each of the 13 Universal energy spirals and how they cycle in 13-day periods. They detail how these 13 Universal energy spirals interact with the cycles of the 20 Earth energy spirals on each calendar day, providing a hundred-year ephemeris and a Pleiadian perspective with which to understand the events in your life. Offering practical examples, they show how you can consciously use the energies prevalent on a given calendar day to your personal, spiritual advantage. Providing a map to transcend all systems that no longer serve us, freeing us to become the enlightened cosmic beings we truly are, the authors show how, with the wisdom of the Pleiadian-Earth energy system, we can each discover our specific gifts, work through the challenges of our own shadows, and individually and collectively evolve into a higher vibrational species.

America at War with Itself Henry A. Giroux 2016-08-22 From poisoned water and police violence in our cities, to gun massacres and hate-mongering on the presidential campaign trail, evidence that America is at war with itself is everywhere around us. The question is not whether or not it's happening, but how to understand the forces at work in order to prevent conditions from getting worse. Henry A. Giroux offers a powerful, far-reaching critique of the economic interests, cultural dimensions, and political dynamics involved in the nation's shift toward increasingly abusive forms of power. His analysis helps us to frame critical questions about what can and should be done to turn things around while we can. Reflecting on a wide range of social issues, Giroux contrasts Donald Trump's America with Sandra Bland's to understand who really benefits from politically fueled intolerance for immigrants, communities of color, Muslims, low-income families, and those who challenge state and corporate power. A passionate advocate for civil rights and the importance of the imagination, Giroux argues that only through widespread social investment in democracy and education can the common good hope to prevail over the increasingly concentrated influence of extreme right-wing politicians and self-serving economic interests. Praise for America at War with Itself: "This is the book Americans need to read now. No one is better than Henry Giroux at analyzing the truly dangerous threats to our society. He punctures our delusions and offers us a compelling and enlightened vision of a better way. America at War with Itself is the best book of the year."—Bob Herbert, Distinguished Senior Fellow at Demos and former Op-Ed columnist for the New York Times "In this current era of corporate media misdirection and misinformation, America at War with Itself is a must read for all Americans, especially young people. Henry Giroux is one of the few great political voices of today, with powerful insight into the truth. Dr. Giroux is defiantly explaining, against the grain, what's REALLY going on right now, and doing so quite undeniably. Simply put, the ideas he brings forth are a beacon that need to be seen and heard and understood in order for the world to progress."—Julian Casablancas "In America at War with Itself, Henry Giroux again proves himself one of North America's most clear-sighted radical philosophers of education, culture and politics: radical because he discards the chaff of liberal critique and cuts to the root of the ills that are withering democracy. Giroux also connects the dots of reckless greed, corporate impunity, poverty, mass incarceration, racism and the co-opting of education to crush critical thinking and promote a culture that denigrates and even criminalizes civil society and the public good. His latest work is the antidote to an alarming tide of toxic authoritarianism that threatens to engulf America. The book could not be more timely."—Olivia Ward, Toronto Star "America at War with Itself makes the case for real ideological and structural change at a time when the need and stakes could not be greater. Everyone who cares about the survival and revival of democracy needs to read this book."—Kenneth Saltman, Professor, University of Massachusetts Dartmouth, Author of The Failure of Corporate School Reform Henry A. Giroux's most recent books include The Violence of Organized Forgetting and America's Addiction to Terrorism. A prolific writer and political commentator, he has appeared in a wide range of media, including the New York Times and Bill

Moyers.

Conservative Government Penal Policy 2015-2021 Christopher David Skinns 2022-08-29 This book interrogates Conservative government penal policy for adult and young adult offenders in England and Wales between 2015 and 2021. Government penal policy is shown to have been often ineffective and costly, and to have revived efforts to push the system towards a disastrous combination of austerity, outsourcing and punishment that has exacerbated the penal crisis. This investigation has meant touching on topical debates dealing with the impact of resource scarcity on offenders' experiences of the penal system, the impact of an increasing emphasis on punishment on offenders' sense of justice and fairness, the balance struck between infection control and offender welfare during the government handling of the SARS-CoV-2 pandemic and why successive Conservative governments have intransigently pursued a penal policy that has proved crisis-exacerbating. The overall conclusion reached is that penal policy is too important to be left to governments alone and needs to be recalibrated by a one-off inquiry, complemented by an on-going advisory body capable of requiring governments to 'explain or change'. The book is distinctive in that it provides a critical review of penal policy change, whilst combining this with insights derived from the sociological analysis of penal trends.

How Financial Conditions Matter Differently across Latin America Mr. Luis Brandao-Marques 2017-10-30 This paper develops comparable financial conditions indices (FCIs) for the six large and most financially-integrated Latin American economies (LA6) by following Korobilis (2013) and Koop and Korobilis (2014). The main findings are as follows. First, the estimated FCIs are influenced by a commodity cycle, a global financial cycle, as well as country-specific episodes of financial distress. Second, by early 2017, financial conditions remained favorable in most LA6 economies relative to historical standards. Third, the impact of financial shocks on economic activity widely varies across LA6 and is otherwise found to be stronger in periods of financial stress. Fourth, exposure to regional financial spillovers also differs across LA6.

Gentrification in Chinese Cities Qinran Yang 2022-05-20 This book provides an institutional interpretation of state-facilitated gentrification in Chengdu, an emerging central city of China. It generalizes the three aspects of institutional changes in the cultural, economic and social spheres that have thus far directed the operation of gentrification in the transitional economy: the creative destruction of consumption spaces, the spatial production of excess, and the unequal

redistribution of spatial resources to low-income residents. The interactions of state and society, are examined in navigating the institutional changes and forming the Chinese distinctions of gentrification. The author argues that these three aspects of institutional changes characterize gentrification in Chengdu as a transformative force of development led by the state and capitalists and championed by middle-class consumers. This gentrification mode periodically catalyzes new spaces and collective cultures, which then necessitate the stimulation of new consumption behaviors and the formation of new consumer classes, at the expense of the spatial demands for the even larger number of low-income residents. However, in the context of China's unique state-society relations, some low-income groups may also ride the wave of social transformation. The author suggests that this type of gentrification integrates into not the essence of uneven geographical development in a capitalist society, but China's unique model of urbanization and development, which is often state-driven, innovative and even involuted so as to sustain continuous growth. Though the research is focused on urban China, this book also contributes to methodological issues on gentrification research on a global scale. It is skeptical both of the structural explanation and of the revelation of unsorted differences; instead, it aims to generate midrange regularities of gentrification in Chinese cities. Institutional change is treated as an intermediary that, on the one hand, responds to the global trends and, on the other hand, adapts to local preconditions. Mixed methods, including statistical and spatial analysis, institutional analysis, and an extensive ethnographic study, are used to investigate gentrification from a structural perspective, a historical perspective, and as a grounded process within the locality.

The Chile-2015 (Illapel) Earthquake and Tsunami Carla Braitenberg 2017-05-20 This volume presents a collection of contributions that were published in "Pure and Applied Geophysics - pageoph" and which deals with the major earthquake that hit Illapel, Chile on September 16, 2015 with magnitude 8.3, and associated trans-oceanic tsunamis. The subducting Nazca plate beneath the Andes caused this major earthquake, generating strong shaking, permanent deformation, free oscillations of the Earth, and tsunamis. This event occurred in the flat-angle subducting segment of the plate. The generated tsunami spread throughout the entire Pacific Ocean and was recorded by numerous coastal tide gauges and open-ocean DART stations. All articles give an up-to-date account of research in one of the most active seismic zones worldwide. An introductory article by Kenji Satake rounds this collection off.

Chinese Foreign Policy Under Xi Tiang Boon Hoo 2017-02-17 There has been a discernable calibration of Chinese foreign policy since the ascension of Xi Jinping to the top leadership positions in China. The operative term here is adjustment rather than renovation because there has not been a fundamental transformation of Chinese foreign policy or "setting up of a new kitchen" in foreign affairs. Several continuities in Chinese diplomacy are still evident. The People's Republic of China (PRC) has not wavered from its overarching strategy of rising through peaceful development. The PRC is still an active participant and leader in, or shaper of, global and regional regimes even as it continues to push for reforms of the extant order, towards an arrangement which it thinks will be less unjust and more equitable. It seeks to better "link up with the international track", perhaps even more so under Xi's stewardship. Yet amidst these continuities, it is clear that there have been some profound shifts in China's foreign policy. From the enunciation of strategic slogans such as the "Asian security concept" and "major country diplomacy with Chinese characteristics"; the creation of the China-led and initiated Asian Infrastructure Investment Bank; the pursuit of Xi's signature foreign policy initiative, the One Belt One Road; to a purportedly more assertive and resolute defense of China's maritime territorial interests in East Asia—examples of these foreign policy calibrations (both patent and subtle)

abound. In short, this has not been a complete metamorphosis but there are real changes, with important repercussions for China and the international system. The burning questions then are What, Where, How and Why: What are these key foreign policy adjustments? Where and how have these occurred in Chinese diplomacy? And what are the reasons or drivers that inform these changes? This book seeks to capture these changes. Featuring contributions from academics, think-tank intellectuals and policy practitioners, all engaged in the compelling business of China-watching, the book aims to shed more light on the calibrations that have animated China's diplomacy under Xi, a leader who by most accounts is considered the most powerful Chinese numero uno since Deng Xiaoping.

How to Practice Mayan Astrology Bruce Scofield 2006-11-27 A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

A Road Unforeseen Meredith Tax 2016-08-01 "This is the book I've been waiting for—only it's richer, deeper, and more intriguing than I could have imagined. *A Road Unforeseen* is a major contribution to our understanding of feminism and Islam, of women and the world, and gives me fresh hope for change." —Barbara Ehrenreich, author of *Nickel and Dimed* and *Living With a Wild God* In war-torn northern Syria, a democratic society—based on secularism, ethnic inclusiveness, and gender equality—has won significant victories against the Islamic State, or Daesh, with women on the front lines as fierce warriors and leaders. *A Road Unforeseen* recounts the dramatic, underreported history of the Rojava Kurds, whose all-women militia was instrumental in

the perilous mountaintop rescue of tens of thousands of civilians besieged in Iraq. Up to that point, the Islamic State had seemed invincible. Yet these women helped vanquish them, bringing the first half of the refugees to safety within twenty-four hours. Who are the revolutionary women of Rojava and what lessons can we learn from their heroic story? How does their political philosophy differ from that of Iraqi Kurdistan, the Islamic State, and Turkey? And will the politics of the twenty-first century be shaped by the opposition between these political models? Meredith Tax is a writer and political activist. Author, most recently, of *Double Bind: The Muslim Right, the Anglo-American Left, and Universal Human Rights*, she was founding president of Women's WORLD, a global free speech network of feminist writers, and cofounder of the PEN American Center's Women's Committee and the International PEN Women Writers' Committee. She is currently international board chair of the Centre for Secular Space and lives in New York.
