**Hands-On High Performance with Spring 5**  
Chintan Mehta 2018-06-12 A hands-on guide to creating, monitoring, and tuning a high performance Spring web application  
Key Features Understand

common performance pitfalls and improve your application's performance Build and deploy strategies for complex applications using the microservice architecture Understand internals of JVM - the

core of all Java Runtime Environments  
Book Description While writing an  
application, performance is  
paramount. Performance tuning for  
real-world applications often  
involves activities geared toward  
detecting bottlenecks. The recent  
release of Spring 5.0 brings major  
advancements in the rich API provided  
by the Spring framework, which means  
developers need to master its tools  
and techniques to achieve high  
performance applications. Hands-On  
High Performance with Spring 5 begins  
with the Spring framework's core  
features, exploring the integration  
of different Spring projects. It  
proceeds to evaluate various Spring  
specifications to identify those  
adversely affecting performance. You  
will learn about bean wiring  
configurations, aspect-oriented

programming, database interaction,  
and Hibernate to focus on the metrics  
that help identify performance  
bottlenecks. You will also look at  
application monitoring, performance  
optimization, JVM internals, and  
garbage collection optimization.  
Lastly, the book will show you how to  
leverage the microservice  
architecture to build a high  
performance and resilient  
application. By the end of the book,  
you will have gained an insight into  
various techniques and solutions to  
build and troubleshoot high  
performance Spring-based  
applications. What you will learn  
Master programming best practices and  
performance improvement with bean  
wiring Analyze the performance of  
various AOP implementations Explore  
database interactions with Spring to

optimize design and configuration  
Solve Hibernate performance issues  
and traps Leverage multithreading and  
concurrent programming to improve  
application performance Gain a solid  
foundation in JVM performance tuning  
using various tools Learn the key  
concepts of the microservice  
architecture and how to monitor them  
Perform Spring Boot performance  
tuning, monitoring, and health checks  
Who this book is for If you're a  
Spring developer who'd like to build  
high performance applications and  
have more control over your  
application's performance in  
production and development, this book  
is for you. Some familiarity with  
Java, Maven, and Eclipse is  
necessary.

**Contesting Islam, Constructing Race  
and Sexuality** Sunera Thobani

2020-12-10 The current political  
standoffs of the 'War on Terror'  
illustrate that the interaction  
within and between the so-called  
Western and Middle Eastern  
civilizations is constantly in flux.  
A recurring theme however is how  
Islam and Muslims signify the 'Enemy'  
in the Western socio-cultural  
imagination and have become the  
'Other' against which the West  
identifies itself. In a unique and  
insightful blend of critical race,  
feminist and post-colonial theory,  
Sunera Thobani examines how Islam is  
foundational to the formation of  
Western identity at critical points  
in its history, including the  
Crusades, the Reconquista and the  
colonial period. More specifically,  
she explores how masculinity and  
femininity are formed at such pivotal

junctures and what role feminism has played in the wars against 'radical' Islam. Exposing these symbiotic relationships, Thobani explores how the return of 'religion' is reworking the racial, gender and sexual politics by which Western society defines itself, and more specifically, defines itself against Islam. Contesting Islam, Constructing Race and Sexuality unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development.

WOMEN IN THE HOUSE : LEADERSHIP IN THE MALAYSIAN PARLIAMENT Ummu Atiyah Ahmad Zakuan 2021-06-08 This book examines the representation of women in the Malaysian Parliament with a focus on the substantive representation of women in the 10th and 11th Dewan Rakyat, the lower house of the Malaysian Parliament. It aims, in particular, to see whether or not female MPs acted for women by proposing women-related issues in the Dewan Rakyat, the female MPs in the forefront of representing women are called critical actors. An in depth look at who these representative is and what were the issues they

propaganda infiltrates private life in China. Propaganda is also the Party's strongest tool for building China's global power. Thanks to both Chinese and non-Chinese spreading China's national myth, the Communist Party of China is fast seducing people all around the world. Jeanne Boden holds a PhD in Oriental Languages and Cultures (Sinology). In her 30 years of engagement with China, she has assembled an impressive archive of photographs depicting propaganda slogans in places across China, from Jilin in the Northeast to Tibet and Xinjiang in the West, from Beijing in the North to Guangdong in the South. This book presents exclusive photographs, revealing China's extensive use of propaganda, and its deep impact domestically and internationally.

More than a compiled list of significant events that portray Trump as the most corrupt American president, this digestible and scannable read of in-the-moment posts pulled from news outlets and credible sources provides an intimate look at how the administration went about breaking the presidential norms on a daily basis. Readers also will have access to citations to fact-check claims.

This quick read on a Trump presidency that started off with outrage and graduated to righteous indignation is a must-have for those who enjoy history, politics, and government or simply want to read about the most notorious presidency in history.

Modern JavaScript Web Development

Cookbook Federico Kereki 2018-12-26  
Over 90 recipes to help you write clean code, solve common JavaScript problems, and work on popular use cases like SPAs, microservices, native mobile development with Node, React, React Native and Electron. Key Features  
Over 90 practical recipes to help you write clean and maintainable JavaScript codes with the latest ES8  
Leverage the power of leading web frameworks like Node and React to build modern web apps  
Features comprehensive coverage of tools and techniques needed to create multi-platform apps with JavaScript  
Book Description  
JavaScript has evolved into a language that you can use on any platform. Modern JavaScript Web Development Cookbook is a perfect blend of solutions for traditional JavaScript development and modern

areas that developers have lately been exploring with JavaScript. This comprehensive guide teaches you how to work with JavaScript on servers, browsers, mobile phones and desktops. You will start by exploring the new features of ES8. You will then move on to learning the use of ES8 on servers (with Node.js), with the objective of producing services and microservices and dealing with authentication and CORS. Once you get accustomed to ES8, you will learn to apply it to browsers using frameworks, such as React and Redux, which interact through Ajax with services. You will then understand the use of a modern framework to develop the UI. In addition to this, development for mobile devices with React Native will walk you through the benefits of creating native apps,

both for Android and iOS. Finally, you'll be able to apply your new-found knowledge of server-side and client-side tools to develop applications with Electron. What you will learn Use the latest features of ES8 and learn new ways to code with JavaScript Develop server-side services and microservices with Node.js Learn to do unit testing and to debug your code Build client-side web applications using React and Redux Create native mobile applications for Android and iOS with React Native Write desktop applications with Electron Who this book is for This book is for developers who want to explore the latest JavaScript features, frameworks, and tools for building complete mobile, desktop and web apps, including server and client-

side code. You are expected to have working knowledge of JavaScript to get the most out of this book.

Telangana EAMCET Engineering 5 Years Solved Papers 2020 Arihant Experts 2019-09-30 Engineering Agricultural and Medical Common Entrance Test (EAMCET) is an entrance examination conducted in some Engineering and Medical Colleges by Jawaharlal Nehru Technological University every year. The new edition of Arihant's "Telangana EAMCET Engineering 5 Years' Solved Papers [2019- 2015]" has been prepared as per the latest question papers of the examination. This book provides the best study material to the candidates who were preparing for this examination. It gives the complete coverage to the syllabus by providing the last 5 years question papers from 2019 to

2015, Online coverage of 2019 & 2018 Papers and web links are provided for EAMCET Solved Papers [2014-2001] so that students can download it and study from anywhere at any point of time. Moreover, solution of each question is well explained with details which helps the candidates to understand better. Thorough practice done from this book ensures good ranking and selection in the top colleges and institutions. *Geotechnical Engineering and Sustainable Construction* Mahdi O. Karkush 2022-03-19 This book contains selected articles from the Second International Conference on Geotechnical Engineering-Iraq (ICGE-

Iraq) held in Akre/Duhok/Iraq from June 22 to 23, 2021, to discuss the challenges, opportunities, and problems of geotechnical engineering in projects. Also, the conference includes modern applications in structural engineering, materials of construction, construction management, planning and design of structures, and remote sensing and surveying engineering. The ICGE-Iraq organized by the Iraqi Scientific Society of Soil Mechanics and Foundation Engineering (ISSSMFE) in cooperation with Akre Technical Institute / Duhok Polytechnic University, College of Engineering /University of Baghdad, and Civil Engineering Department/University of Technology. The book covers a wide spectrum of themes in civil engineering, including but not

limited to sustainability and environmental-friendly applications. The contributing authors are academic and researchers in their respective fields from several countries. This book will provide a valuable resource for practicing engineers and researchers in the field of geotechnical engineering, structural engineering, and construction and management of projects.

ICGG 2018 - Proceedings of the 18th International Conference on Geometry and Graphics Luigi Cocchiarella

2018-07-06 This book gathers peer-reviewed papers presented at the 18th International Conference on Geometry and Graphics (ICGG), held in Milan, Italy, on August 3-7, 2018. The spectrum of papers ranges from theoretical research to applications, including education, in several

fields of science, technology and the arts. The ICGG 2018 mainly focused on the following topics and subtopics: Theoretical Graphics and Geometry (Geometry of Curves and Surfaces, Kinematic and Descriptive Geometry, Computer Aided Geometric Design), Applied Geometry and Graphics (Modeling of Objects, Phenomena and Processes, Applications of Geometry in Engineering, Art and Architecture, Computer Animation and Games, Graphic Simulation in Urban and Territorial Studies), Engineering Computer Graphics (Computer Aided Design and Drafting, Computational Geometry, Geometric and Solid Modeling, Image Synthesis, Pattern Recognition, Digital Image Processing) and Graphics Education (Education Technology Research, Multimedia Educational Software Development, E-

learning, Virtual Reality, Educational Systems, Educational Software Development Tools, MOOCs). Given its breadth of coverage, the book introduces engineers, architects and designers interested in computer applications, graphics and geometry to the latest advances in the field, with a particular focus on science, the arts and mathematics education.

**Uber** B. Yasanthi Perera 2020-01-31  
Uber is one of the most innovative companies of our time. This book provides a detailed analysis of the company and its success, beyond the headlines about safety and culture. Americans are so accustomed to using Uber today that the name of the innovative ride-sharing company has almost become a verb, as in "to Uber" somewhere, and yet Uber has been around only since 2010. In less than

a decade, Uber has disrupted the ride-hailing industry, from making it easier and more affordable to become an Uber driver than a cab driver to rating riders as well as drivers. As an early pioneer in using technology to create a new business model and new efficiencies, Uber is considered one of the most important case studies in the sharing economy. However, little in-depth information exists on this innovative company. This book traces Uber's origin and evolution in the face of competitive pressures, discusses the company leadership and corporate culture, addresses such controversies as rider and driver safety and sexual harassment of female employees, and explores how the company is addressing these challenges. Students of business, entrepreneurs, and

anyone interested in the development and exponential growth of the sharing economy will benefit from reading this book. Provides key insights into the inner workings of the Sharing Economy Delivers a comprehensive overview of Uber's technological innovations, global expansion, and business model Explores the leadership challenges faced by founder Travis Kalanick Reveals how the company has addressed reports of a sexist corporate culture

Hacking with Python and Kali-Linux  
Alicia Noors 2020-12-11 Python is an easy to learn, yet very diverse and powerful programming language and that for the language of choice for many hackers. Learn to write your own tools and use them on Kali Linux to see how hackers attack systems and

exploit vulnerabilities. Developing your own tools will give you a much deeper understanding of how and why attacks work. After a short introduction to programming with Python, you will learn to write a wide variety of hacking tools using many practical examples. You will quickly find out for yourself how terrifyingly simple that is. By integrating existing tools such as Metasploit and Nmap, scripts become even more efficient and shorter. Use the knowledge you have gained here to test your systems for security holes and close them before others can take advantage of them!

NATIONAL BESTSELLER • The gripping story of Elizabeth Holmes and Theranos—one of the biggest corporate frauds in history—a tale of ambition and hubris set amid the bold promises of Silicon Valley, rigorously reported by the prize-winning journalist. With a new Afterword.  
“Chilling ... Reads like a thriller ... Carreyrou tells [the Theranos story] virtually to perfection.” —The New York Times Book Review In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the next Steve Jobs: a brilliant Stanford dropout whose startup “unicorn” promised to revolutionize the medical industry with its breakthrough device, which performed the whole

range of laboratory tests from a single drop of blood. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at more than \$9 billion, putting Holmes’s worth at an estimated \$4.5 billion. There was just one problem: The technology didn’t work. Erroneous results put patients in danger, leading to misdiagnoses and unnecessary treatments. All the while, Holmes and her partner, Sunny Balwani, worked to silence anyone who voiced misgivings—from journalists to their own employees.

**Stream Processing with Apache Spark**  
Gerard Maas 2019-06-05 Before you can build analytics tools to gain quick insights, you first need to know how to process data in real time. With

this practical guide, developers familiar with Apache Spark will learn how to put this in-memory framework to use for streaming data. You'll discover how Spark enables you to write streaming jobs in almost the same way you write batch jobs. Authors Gerard Maas and François Garillot help you explore the theoretical underpinnings of Apache Spark. This comprehensive guide features two sections that compare and contrast the streaming APIs Spark now supports: the original Spark Streaming library and the newer Structured Streaming API. Learn fundamental stream processing concepts and examine different streaming architectures Explore Structured Streaming through practical examples; learn different aspects of stream processing in

detail Create and operate streaming jobs and applications with Spark Streaming; integrate Spark Streaming with other Spark APIs Learn advanced Spark Streaming techniques, including approximation algorithms and machine learning algorithms Compare Apache Spark to other stream processing projects, including Apache Storm, Apache Flink, and Apache Kafka Streams

International and Comparative Librarianship Peter Johan Lor 2019-06-17 Based on his extensive experience in international librarianship, Peter Johan Lor, South Africa's first National Librarian and a former Secretary General of the IFLA, has written the first comprehensive and systematic overview of international and comparative librarianship. His book provides a

conceptual framework and methodological guidelines for the field and covers the full range of international relations among libraries and information services, with particular attention to the international political economy of information, the international diffusion of innovations and policy in library and information services, LIS development and international aid. It concludes with a discussion of the practical relevance and future of international and comparative studies in LIS. See a short interview with Peter Lor on his work

*A Trader's Guide to Financial Astrology* Larry Pasavento 2015-01-06

Look to the stars for a whole new approach to market cycle forecasting  
*A Trader's Guide to Financial*

Astrology is the definitive guide to trading market cycles based on astrological data. Written by a highly-respected technical analyst, this book makes the connection between the movements of planets and the volatility of the market. Readers can draw upon one hundred years of historical data as they learn how to spot correlations from the past, and refer to planetary and lunar data for the next five years as they shape their own strategy. The book covers the principles of astrological forecasting as applied to the financial markets, explaining what to watch for and how to interpret planetary and lunar activity, plus expert insight on everyday practical application. A study by the Federal Reserve Bank of Atlanta determined that the U.S. stock markets tend to

be negatively affected by geomagnetic storms, and the Royal Bank of Scotland demonstrated that a trading system based on the phases of the moon would have outperformed the market. A Trader's Guide to Financial Astrology shows traders how to tap into the planetary forces that influence market activity. Readers will: Learn how planetary and lunar movements relate to the financial markets Draw upon 100 years of historic correlations and five years of forecast data Forecast long-term and short-term activity based on planetary relationships and lunar movement Enter the markets at key turning points, using price patterns and other tools When integrated with technical trading patterns, astrology can be an effective way of shifting perspective and approaching the

market differently. For traders who have always wanted to know what to do when Mercury is in retrograde or the moon is new, A Trader's Guide to Financial Astrology provides information and insight from a leading market educator.

*Introducing InnoDB Cluster* Charles Bell 2018-09-07 Set up, manage, and configure the new InnoDB Cluster feature in MySQL from Oracle. If you are growing your MySQL installation and want to explore making your servers highly available, this book provides what you need to know about high availability and the new tools that are available in MySQL 8.0.11 and later. *Introducing InnoDB Cluster* teaches you about the building blocks that make up InnoDB Cluster such as MySQL Group Replication for storing data redundantly, MySQL Router for

the routing of inbound connections, and MySQL Shell for simplified setup and configuration, status reporting, and even automatic failover. You will understand how it all works together to ensure that your data are available even when your primary database server goes down. Features described in this book are available in the Community Edition of MySQL, beginning with the version 8.0.11 GA release, making this book relevant for any MySQL users in need of redundancy against failure. Tutorials in the book show how to configure a test environment and plan a production deployment. Examples are provided in the form of a walk-through of a typical MySQL high-availability setup. What You'll Learn Discover the newest high-availability features in MySQL Set up and use

InnoDB Cluster as an HA solution Migrate your existing servers to MySQL 8 Employ best practices for using InnoDB Cluster Configure servers for optimal automatic failover to ensure that applications continue when a server fails Configure MySQL Router to load-balance inbound connections to the cluster Who This Book Is For Systems engineers, developers, and database professionals wanting to learn about the powerful high availability (HA) features, beginning with MySQL 8.0.11: MySQL Shell, MySQL Router, and MySQL Group Replication. The book is useful for those designing high-availability systems backed by a database, and for those interested in open source HA solutions. **Keras Reinforcement Learning Projects** Giuseppe Ciaburro 2018-09-29 A

practical guide to mastering reinforcement learning algorithms using Keras Key FeaturesBuild projects across robotics, gaming, and finance fields, putting reinforcement learning (RL) into actionGet to grips with Keras and practice on real-world unstructured datasetsUncover advanced deep learning algorithms such as Monte Carlo, Markov Decision, and Q-learningBook Description Reinforcement learning has evolved a lot in the last couple of years and proven to be a successful technique in building smart and intelligent AI networks. Keras Reinforcement Learning Projects installs human-level performance into your applications using algorithms and techniques of reinforcement learning, coupled with Keras, a faster experimental library. The book begins

with getting you up and running with the concepts of reinforcement learning using Keras. You'll learn how to simulate a random walk using Markov chains and select the best portfolio using dynamic programming (DP) and Python. You'll also explore projects such as forecasting stock prices using Monte Carlo methods, delivering vehicle routing application using Temporal Distance (TD) learning algorithms, and balancing a Rotating Mechanical System using Markov decision processes. Once you've understood the basics, you'll move on to Modeling of a Segway, running a robot control system using deep reinforcement learning, and building a handwritten digit recognition model in Python using an image dataset. Finally, you'll excel in playing the board

game Go with the help of Q-Learning and reinforcement learning algorithms. By the end of this book, you'll not only have developed hands-on training on concepts, algorithms, and techniques of reinforcement learning but also be all set to explore the world of AI. What you will learn Practice the Markov decision process in prediction and betting evaluations Implement Monte Carlo methods to forecast environment behaviors Explore TD learning algorithms to manage warehouse operations Construct a Deep Q-Network using Python and Keras to control robot movements Apply reinforcement concepts to build a handwritten digit recognition model using an image dataset Address a game theory problem using Q-Learning and OpenAI Gym Who this book is for Keras Reinforcement

Learning Projects is for you if you are data scientist, machine learning developer, or AI engineer who wants to understand the fundamentals of reinforcement learning by developing practical projects. Sound knowledge of machine learning and basic familiarity with Keras is useful to get the most out of this book *Interest Rate Derivatives Explained: Volume 2* Jörg Kienitz 2017-11-08 This book on Interest Rate Derivatives has three parts. The first part is on financial products and extends the range of products considered in *Interest Rate Derivatives Explained I*. In particular we consider callable products such as Bermudan swaptions or exotic derivatives. The second part is on volatility modelling. The Heston and the SABR model are reviewed and analyzed in detail. Both

models are widely applied in practice. Such models are necessary to account for the volatility skew/smile and form the fundament for pricing and risk management of complex interest rate structures such as Constant Maturity Swap options. Term structure models are introduced in the third part. We consider three main classes namely short rate models, instantaneous forward rate models and market models. For each class we review one representative which is heavily used in practice. We have chosen the Hull-White, the Cheyette and the Libor Market model. For all the models we consider the extensions by a stochastic basis and stochastic volatility component. Finally, we round up the exposition by giving an overview of the numerical methods that are relevant

for successfully implementing the models considered in the book. The Corrosion of Conservatism: Why I Left the Right Max Boot 2018-10-09 Warning that the Trump presidency presages America's decline, the political commentator recounts his extraordinary journey from lifelong Republican to vehement Trump opponent. As nativism, xenophobia, vile racism, and assaults on the rule of law threaten the very fabric of our nation, *The Corrosion of Conservatism* presents an urgent defense of American democracy. Pronouncing Mexican immigrants to be "rapists," Donald Trump announced his 2015 presidential bid, causing Max Boot to think he was watching a dystopian science-fiction movie. The respected conservative historian couldn't fathom that the party of

Lincoln, Roosevelt, and Reagan could endorse such an unqualified reality-TV star. Yet the Twilight Zone episode that Boot believed he was watching created an ideological dislocation so shattering that Boot's transformation from Republican foreign policy adviser to celebrated anti-Trump columnist becomes the dramatic story of The Corrosion of Conservatism. No longer a Republican, but also not a Democrat, Boot here records his ideological journey from a "movement" conservative to a man without a party, beginning with his political coming-of-age as a young émigré from the Soviet Union, enthralled with the National Review and the conservative intellectual tradition of Russell Kirk and F. A. Hayek. Against this personal odyssey, Boot simultaneously traces the

evolution of modern American conservatism, jump-started by Barry Goldwater's canonical The Conscience of a Conservative, to the rise of Trumpism and its gradual corrosion of what was once the Republican Party. While 90 percent of his fellow Republicans became political "toadies" in the aftermath of the 2016 election, Boot stood his ground, enduring the vitriol of his erstwhile conservative colleagues, trolled on Twitter by a white supremacist who depicted his "execution" in a gas chamber by a smiling, Nazi-clad Trump. And yet, Boot nevertheless remains a villain to some partisan circles for his enduring commitment to conservative fiscal and national security principles. It is from this isolated position, then, that Boot launches this bold declaration of

dissent and its urgent plea for true, bipartisan cooperation. With uncompromising insights, *The Corrosion of Conservatism* evokes both a president who has traduced every norm and the rise of a nascent centrist movement to counter Trump's assault on democracy.

In Depth Security Vol. III Stefan Schumacher 2019-11-04 This book contains a broad spectrum of carefully researched articles dealing with IT-Security: the proceedings of the DeepSec InDepth Security conference, an annual event well known for bringing together the world's most renowned security professionals from academics, government, industry, and the underground hacking community. In cooperation with the Magdeburger Institut für Sicherheitsforschung

(MIS) we publish selected articles covering topics of past DeepSec conferences. The publication offers an in-depth description which extend the conference presentation and includes a follow-up with updated information. Carefully picked, these proceedings are not purely academic, but papers written by people of practice, international experts from various areas of the IT-Security zoo. You find features dealing with IT-Security strategy, the social domain as well as with technical issues, all thoroughly researched and hyper contemporary. We want to encourage individuals, organizations and countries to meet and exchange, to improve overall security, understanding and trust. We try to combine hands-on practice with scientific approach. This book is

bringing it all together.

**The Defeat of Barisan Nasional**

Francis E Hutchinson 2019-12-16 The results of Malaysia's 14th General Elections of May 2018 were unexpected and transformative. Against conventional wisdom, the newly reconfigured opposition grouping Pakatan Harapan (PH) decisively defeated the incumbent Barisan Nasional (BN), ending six decades of uninterrupted dominant one-party rule. Despite a long-running financial scandal dogging the ruling coalition, pollsters and commentators predicted a solid BN victory or, at least, a narrow parliamentary majority. Yet, on the day, deeply rooted political dynamics and

influential actors came together, sweeping aside many prevailing assumptions and reconfiguring the country's political reality in the process. In order to understand the elections and their implications, this edited volume brings together contributions from ISEAS – Yusof Ishak Institute researchers and a group of selected collaborators to examine the elections from three angles: campaign dynamics; important trends among major interest groups; and local-level dynamics and developments in key states. This analytical work is complemented by personal narratives from a selection of GE-14 participants.

Pro Spring Boot 2 Felipe Gutierrez  
2018-12-12 Quickly and productively develop complex Spring applications and microservices out of the box, with minimal concern over things like configurations. This revised book will show you how to fully leverage the Spring Boot 2 technology and how to apply it to create enterprise ready applications that just work. It

will also cover what's been added to the new Spring Boot 2 release, including Spring Framework 5 features like WebFlux, Security, Actuator and the new way to expose Metrics through Micrometer framework, and more. This book is your authoritative hands-on practical guide for increasing your enterprise Java and cloud application productivity while decreasing development time. It's a no nonsense guide with case studies of increasing complexity throughout the book. The author, a senior solutions architect and Principal Technical instructor with Pivotal, the company behind the Spring Framework, shares his experience, insights and first-hand knowledge about how Spring Boot technology works and best practices. Pro Spring Boot 2 is an essential book for your Spring learning and

reference library. What You Will Learn Configure and use Spring Boot Use non-functional requirements with Spring Boot Actuator Carry out web development with Spring Boot Persistence with JDBC, JPA and NoSQL Databases Messaging with JMS, RabbitMQ and WebSockets Test and deploy with Spring Boot A quick look at the Spring Cloud projects Microservices and deployment to the Cloud Extend Spring Boot by creating your own Spring Boot Starter and @Enable feature Who This Book Is For Experienced Spring and Java developers seeking increased productivity gains and decreased complexity and development time in their applications and software services.

Some New Aspects of Colloidal Systems in Foods Jafar Milani 2019-03-20 Some

New Aspects of Colloidal Systems in Foods is a new book on food emulsions, which provides in-depth coverage of some new aspects of food colloids. The coverage includes confident overviews of theoretical issues as well as descriptions of new techniques and recent colloid research findings. Specific topics include the role of electrostatic and steric forces in the stabilization of food colloids, antioxidants in food emulsions, nanoemulsions, and nanostructured colloids in food science. This book can be used as a specialized text for graduate students and researchers in food science and technology. In addition, it will serve as a reference text for advanced students in chemistry, engineers, biochemists, nutritionists, and analytical

chemists in the food industry and research.

**Religious Communities and Civil Society in Europe, Volume I** Rupert

Graf Strachwitz 2019-08-19 The seemingly vitalizing impact of religiosity on civil society is a research topic that has been extensively looked into, not only in the USA, but increasingly also in a European context. What is missing is an evaluation of the role of institutionalized religious communities, and of circumstances that facilitate or impede their status as civil society organisations. This anthology in two volumes aims at closing this gap by providing case studies regarding political, legal and historical

aspects in various European countries. Vol. I provides an introduction and looks at cases in Greece, Italy, the Netherlands, Sweden, and Bosnia and Herzegovina, as well as chapters on legal issues and data, and comprehensive bibliography.

*A Middle East Free of Weapons of Mass*

*Destruction* Seyed Hossein Mousavian

2020-04-01 The establishment of a Middle East zone free of nuclear weapons, a concept more recently broadened to cover all weapons of mass destruction (WMD), has been before the international community for decades. In this book, two experts from the region explore why the matter remains unresolved, and outline a comprehensive yet achievable roadmap to a Middle East free of WMD. Weapons of mass

destruction pose an existential threat to global peace and security. But nowhere is it more urgent to stem their spread than in the Middle East, a region fraught with mistrust and instability. Accounting for these geopolitical realities, including the ongoing talks to curb Iran's nuclear program, the authors present a practical and innovative strategy to a Middle East free of weapons of mass destructions (WMD). They outline a phased approach toward disarmament in the region, prescribing confidence-building measures and verification tools to create trust among the region's governments. Their vision also sees the realization of a WMD-free zone within a broader regional agenda for security and cooperation to advance socioeconomic and political progress. This book will be

of great interest to students and scholars of international relations, politics and security studies in the Middle East.

**Privileged Victims** Eddie Scarry  
2020-02-25 America's worst ideas and people are rising to the top, thanks to a rancid culture that has turned every part of our lives into a fight between so-called "privilege" and entitled brats claiming "victim" status. The country is under siege and America's most ferocious enemy is already here: our privileged victims. On university campuses, in the news media, and in Hollywood, race, gender, and sexuality determine who should advance and who should be taken down a peg. Driven by "social justice" and governed by "intersectionality," out-of-control college students, school

administrators, journalists, and titans of the entertainment industry divide and rank us on an infinite scale of grievance—the more of them, the better. And God have mercy on any individual deemed to benefit from "privilege." Privileged Victims zealously exposes the lies and myths behind: • The #MeToo movement that redefined sexual assault and rape to include simple regret, ruining the lives and careers of countless men • Hoax hate crimes, a key feature of the privileged victim class • The debate over our jungle-like immigration system, dumbed down by a scheming national news media to ugly charges of racism and xenophobia • Hollywood, which no longer aims to produce high-quality entertainment, but to virtue signal and promote "social justice" And so much more. In

gripping detail, Eddie Scarry uncovers the perversion behind social justice and its identity-first dogma that's replacing America's meritocracy, tracing its origins in academia and shining a light on the havoc it has wrought over the course of three decades. Bewildered citizens mistakenly believe that it's a matter of political correctness gone too far or the ailing symptoms of a country that has grown too sensitive. The truth is much worse: it's a deliberate, malignant reorganization of American life and the replacement of merit with mediocrity is the ultimate destination. "How did everyone in America get so unhappy all of a sudden? In part, because it pays. Eddie Scarry lays out the scam in this infuriating and fascinating book. It'll make you never want to

complain again, just for the sake of being countercultural." –Tucker Carlson, Host of "Tucker Carlson Tonight" on Fox News and Author of Ship of Fools "What I love about Eddie is his courage. He knows the outrage mob is constantly coming and he doesn't care. Some of us call that being a First Amendment advocate. Count me as a fan and a reader."—Megyn Kelly

**Introduction to Python for Science and Engineering** David J. Pine

2019-03-15 Series in Computational Physics Steven A. Gottlieb and Rubin H. Landau, Series Editors  
Introduction to Python for Science and Engineering This guide offers a quick and incisive introduction to Python programming for anyone. The author has carefully developed a concise approach to using Python in

any discipline of science and engineering, with plenty of examples, practical hints, and insider tips. Readers will see why Python is such a widely appealing program, and learn the basics of syntax, data structures, input and output, plotting, conditionals and loops, user-defined functions, curve fitting, numerical routines, animation, and visualization. The author teaches by example and assumes

no programming background for the reader. David J. Pine is the Silver Professor and Professor of Physics at New York University, and Chair of the Department of Chemical and Biomolecular Engineering at the NYU Tandon School of Engineering. He is an elected fellow of the American Physical Society and American Association for the Advancement of Science (AAAS), and is a Guggenheim Fellow.
