# 2018/06

As recognized, adventure as with ease as experience practically lesson, amusement, as capably as deal can be gotten by just checking out a ebook **2018/06** in addition to it is not directly done, you could acknowledge even more with reference to this life, vis--vis the world.

We present you this proper as capably as easy pretentiousness to get those all. We have enough money 2018/06 and numerous book collections from fictions to scientific research in any way. in the midst of them is this 2018/06 that can be your partner.

EIB Working Papers 2018/06 - Resource Misallocation in European Firms European Investment Bank 2018-11-22 Using EIBIS, this paper shows that the dispersion of marginal products across firms in the European Union is about twice as large as that in the United States and estimate potential increases in GDP from the removal of barriers between industries and countries. It examines the role of firm characteristics and emphasizes that some firm characteristics may reflect compensating differentials rather than constraints and the effect of constraints on the dispersion of marginal products may hence be smaller than has been assumed in the literature. It also shows that cross-country differences in the dispersion of marginal products are more due to differences in how the business, institutional and policy environment translates firm characteristics into outcomes than to the differences in firm characteristics per se. Contemporary Issues in
International Political Economy
Fu-Lai Tony Yu 2019-05-22 This
book is the product of a team-
teaching course entitled,
"Issues in Economic
Development" offered to the
final-year students of
Department of Economics and
Finance at Hong Kong Shue Yan
University. In this volume, the
authors comprehensively
survey world's most
controversial issues in
economic and political affairs.
Topics in this volume cover
Christianity-Islam confrontation;
ISIS and anti-terrorism; North
Korea and Taiwan-Strait Crises;
China's rise as a global power;
Brexit; Artificial Intelligence;
Bitcoin; same sex marriage;
global warming; happiness and
well-being. This book can be
used as a reader or textbook in
courses such as "International
Political Economy" and
"International Development", or
as a reference for scholars and
policy makers.
Continuous Delivery in Java
Daniel Bryant 2018-11-09
Continuous delivery adds
enormous value to the business
and the entire software delivery
lifecycle, but adopting this
practice means mastering new
skills typically outside of a
developer's comfort zone. In
this practical book, Daniel
Bryant and Abraham Marín-
Pérez provide guidance to help
experienced Java developers
master skills such as
architectural design, automated
quality assurance, and
application packaging and
deployment on a variety of
platforms. Not only will you
learn how to create a
comprehensive build pipeline
for continually delivering
effective software, but you'll
also explore how Java
application architecture and
deployment platforms have
affected the way we rapidly and
safely deliver new software to
production environments. Get

advice for beginning or completing your migration to continuous delivery Design architecture to enable the continuous delivery of Java applications Build application artifacts including fat JARs, virtual machine images, and operating system container (Docker) images Use continuous integration tooling like Jenkins, PMD, and find-sec-bugs to automate code quality checks Create a comprehensive build pipeline and design software to separate the deploy and release processes Explore why functional and system quality attribute testing is vital from development to delivery Learn how to effectively build and test applications locally and observe your system while it runs in production

High-Throughput Field Phenotyping to Advance Precision Agriculture and Enhance Genetic Gain Urs Schmidhalter 2021-08-10 CLC 2018: Carpathian Logistics Congress Machine Learning for Networking Selma Boumerdassi 2020-04-19 This book constitutes the thoroughly refereed proceedings of the Second International Conference on Machine Learning for Networking, MLN 2019, held in Paris, France, in December 2019. The 26 revised full papers included in the volume were carefully reviewed and selected from 75 submissions. They present and discuss new trends in deep and reinforcement learning, patternrecognition and classi cation for networks, machine learning for network slicingoptimization, 5G system, user behavior prediction, multimedia, IoT, securityand protection, optimization and new innovative machine learning methods, performanceanalysis of machine learning algorithms, experimental evaluations ofmachine learning, data mining in heterogeneous networks, distributed and decentralizedmachine learning algorithms, intelligent cloud-support communications,ressource allocation, energy-aware communications, software de

ned networks,cooperative networks, positioning and navigation systems, wireless communications,wireless sensor networks, underwater sensor networks.

**The AOC Generation** David Freedlander 2021-03-30 A grassroots look at the future of US politics as the next generation of progressive organizers—sparked by the unstoppable rise of Alexandria Ocasio-Cortez—leads us toward a new direction The AOC Generation examines the resurgent young left—including groups like Justice Democrats, the Democratic Socialists of America and Brand New Congress—and documents how and why they got active and energized in political organizing, the success and limitations of their approaches—and through their stories, it tells the history and the future of a generation. In 2018, the country watched as Alexandria Ocasio-Cortez rose from unknown part-time bartender to the halls of Congress at the age of 29 and became a household name for her progressive, passionate politics. With firsthand accounts detailing the final days of her campaign, which he spent beside her as she fought for every last vote, Freedlander connects her ample political talents and ability to command the media and the public's attention to the newfound political awakening of millennial activists. Inspired in part by the Bernie Sanders campaign, and furthered by a series of critical issues including catastrophic climate change, a rigid political system, and widening income inequality, these young people organized into new groups that became a conduit for their energy, ideas, and passions. And all of their activity isn't just political. They've created their own media eco-system, with podcasts, streaming networks, and even dating sites that cater to their interests. With this new generation gaining traction, with little signs of backing down and securing crucial political seats as Ocasio-Cortez did in 2018, The AOC Generation presents a thoughtful analysis of how they came of age in an

America they are determined to reshape.

Global Competitiveness: Business Transformation in the Digital Era Ade Gafar Abdullah 2019-07-25 The proceedings of the "Economics and Business Competitiveness International Conference" (EBCICON) provides a selection of papers, either research results or literature reviews, on business transformation in the digital era. Nine major subject areas, comprising accounting and governance, customer relations, entrepreneurship, environmental issues, finance and investment, human capital, industrial revolution 4.0, international issues, and operations and supply chain management are presented in the proceedings. These papers will provide new insights into the knowledge and practice of business and economics in the digital era. Therefore, parties involved in business and economics such as academics, practitioners, business leaders, and others will be interested in the contents of the proceedings.

Artificial Intelligence-Based Energy Management Systems for Smart Microgrids Baseem Khan 2022-06-07 Modeling and optimization of energy management systems for micro- and mini-grids play an important role in the fields of energy generation dispatch, system operation, protection coordination, power quality issues, and peak demand conflict with grid security. This comprehensive reference text provides an in-depth insight into these topics. This text discusses the use of meta-heuristic and artificial intelligence algorithms for developing energy management systems with energy use prediction for mini- and microgrid systems. It covers important concepts including modeling of microgrid and energy management systems, optimal protection coordination-based microgrid energy management, optimal energy dispatch with energy management systems, and peak demand management with energy management systems. Key Features:

Presents a comprehensive discussion of mini- and microgrid concepts Discusses AC and DC microgrid modeling in detail Covers optimization of mini- and microgrid systems using AI and meta-heuristic techniques Provides MATLAB®-based simulations on a mini- and microgrid Comprehensively discussing concepts of microgrids with the help of software-based simulations, this text will be useful as a reference text for graduate students and professionals in the fields of electrical engineering, electronics and communication engineering, renewable energy, and clean technology.

Trade Wars The New York Times Editorial Staff 2018-12-15 For many years, the United States has had established trade agreements with other countries to regulate the even flow of goods and maintain a healthy economy. But many of these entrenched trade agreements have now been upended, and with new tariffs being implemented, the global economic relationships between countries are changing. Will new tariffs help or hurt the United States and its traditional allies? How will U.S. industries be affected? With newer, more severe tariffs in place, bringing tariff retaliation from other trading partners, the future of trade relationships is shifting and uncertain.

Beginning Ethical Hacking with Kali Linux Sanjib Sinha 2018-11-29 Get started in white-hat ethical hacking using Kali Linux. This book starts off by giving you an overview of security trends, where you will learn the OSI security architecture. This will form the foundation for the rest of Beginning Ethical Hacking with Kali Linux. With the theory out of the way, you'll move on to an introduction to VirtualBox,

networking, and common Linux commands, followed by the step-by-step procedure to build your own web server and acquire the skill to be anonymous . When you have finished the examples in the first part of your book, you will have all you need to carry out safe and ethical hacking experiments. After an introduction to Kali Linux, you will carry out your first penetration tests with Python and code raw binary packets for use in those tests. You will learn how to find secret directories on a target system, use a TCP client in Python, and scan ports using NMAP. Along the way you will discover effective ways to collect important information, track email, and use important tools such as DMITRY and Maltego, as well as take a look at the five phases of penetration testing. The coverage of vulnerability analysis includes sniffing and spoofing, why ARP poisoning is a threat, how SniffJoke prevents poisoning, how to analyze protocols with Wireshark, and using sniffing packets with Scapy. The next part of the book shows you detecting SQL injection vulnerabilities, using sqlmap, and applying brute force or password attacks. Besides learning these tools, you will see how to use OpenVas, Nikto, Vega, and Burp Suite. The book will explain the information assurance model and the hacking framework Metasploit, taking you through important commands, exploit and payload basics. Moving on to hashes and passwords you will learn password testing and hacking techniques with John the Ripper and Rainbow. You will then dive into classic and modern encryption techniques where you will learn the conventional cryptosystem. In the final chapter you will acquire the skill of exploiting remote Windows and Linux systems and you will learn how to own a target completely. What You Will LearnMaster common Linux commands and networking techniques Build your own Kali web server and learn to be anonymous Carry out penetration testing using Python Detect sniffing attacks

and SQL injection vulnerabilities Learn tools such as SniffJoke, Wireshark, Scapy, sqlmap, OpenVas, Nikto, and Burp Suite Use Metasploit with Kali Linux Exploit remote Windows and Linux systemsWho This Book Is For Developers new to ethical hacking with a basic understanding of Linux programming.

Data Analytics Applied to the Mining Industry Ali Soofastaei 2020-11-12 Data Analytics Applied to the Mining Industry describes the key challenges facing the mining sector as it transforms into a digital industry able to fully exploit process automation, remote operation centers, autonomous equipment and the opportunities offered by the industrial internet of things. It provides guidelines on how data needs to be collected, stored and managed to enable the different advanced data analytics methods to be applied effectively in practice, through use of case studies, and worked examples. Aimed at graduate students, researchers, and professionals in the industry of mining engineering, this book: Explains how to implement advanced data analytics through case studies and examples in mining engineering Provides approaches and methods to improve data-driven decision making Explains a concise overview of the state of the art for Mining Executives and Managers Highlights and describes critical opportunity areas for mining optimization Brings experience and learning in digital transformation from adjacent sectors

Development and Application of Bituminous Materials for Civil Infrastructures Hui Yao 2021-10-22

**Biotechnological Innovations for Environmental Bioremediation** Sudipti Arora 2022-09-04 This edited book focuses on the application and implementation of bioremediation and other strategies to create a sustainable and healthy environment. It provides a collection of approaches to environmental biotechnology for wastewater treatment,

removal of soil heavy metals, degradation of pesticides, removal of dyes, waste management, and microbial conversion of environmental pollutants. This book brings to the fore contributions of certain globally important environmental biotechnologist. Bioremediation is a popular branch of biotechnology that involves the use of living organisms such as microorganisms (microbial remediation), bacteria, fungus (mycoremediation), and plants (phytoremediation) to bind, extract, and clean up contaminants, pollutants, and toxins from soil, groundwater, and other environments. This book is of interest to researchers, scientists, and academic faculty in environmental sciences. Also, it serves as additional reading and reference material for undergraduate and graduate students as well as postdocs in environmental, agriculture, ecology, and soil sciences. National and International policy makers will also find valuable information from this book.

## A President's Daily Brief: Year 2 Micah Fisher-Kirshner

## What was daily life under the Trump presidency really like?

An accessible ebook with short, thematic entries showing the corruption of the Trump presidency, A President's Daily Brief, Year 2: The Day-by-Day Lurch of Trump's Norm-Breaking Presidency is the second in Micah Fisher-Kirshner's series, representing the second year of Trump's time in power and the subversion that occurred. More than a compiled list of significant events that portray Trump as the most corrupt American president, this digestible and scannable read of in-the-moment posts pulled from news outlets and credible sources provides an intimate look at how the administration went about breaking the presidential norms on a daily basis. Readers also will have access to citations to fact-check claims.

This quick read on a Trump presidency that started off with outrage and graduated to righteous indignation is a must-have for those who enjoy history, politics, and government or simply want to read about the most notorious presidency in history.

## WildFly Performance Tuning

Francesco Marchioni 2021-05-23 JBoss Application server is the most popular open-source Java application server, renamed as WildFly. This book has been updated (May 2021) to guide you in improving the performance of modern applications running on the top of it, covering details such as: - Get the most from the environment where WildFly is running - Monitor and optimize the JVM by analyzing its behavior - Learn various tools to monitor WildFly - Monitor and tune various subsystems included within WildFly - Know the pros and cons of application server settings - Discover low level details to tune a clustered WildFly environment ...and much more!

*East Benue-Congo* John R. Watters This volume is the first in what hopefully will be a growing set of edited volumes and monographs concerning Niger-Congo comparative studies. This first volume addresses matters that are relevant to the entire East Benue-Congo family as well as the particular branches Kainji, Plateau, and Bantoid. In the case of Bantoid, the particular focus is on Grassfields and the Grassfields-Bantu borderland, though other Bantoid subgroups are referenced. The potential topics for comparative studies among these languages are numerous, but this volume is dedicated to presentations on nominal affixes, third person pronouns, and verbal extensions. A forthcoming volume will provide some results of reconstructions and lexicostatistics in Cross River, exploratory reconstructions in Southern Jukunoid, and reconstructions in Ekoid-Mbe and Mambiloid.

**ALTERNATIVE MEDICINE (CAM) IN THE WORLD** The

Professional Chamber Sanator – the Union of Biotronicists of Josef Zezulka 2019-02-09 For some time now, the professional and general public in the Czech Republic have been receiving incomplete and often biased information on complementary and alternative medicine (CAM). Leading European and world authorities – the World Health Organization (WHO), the Council of Europe, European research CAMbrella funded by the European Commission, European network EUROCAM, are all entirely in favour of CAM, and without exception recommend CAM research and integration into the routine care. The contradiction between 'here and there' is literally explosive. The 'world' is entirely elsewhere. Respective details are given in the information publication 'Alternative Medicine (CAM) in the World', published by the Professional Chamber Sanator – the Union of Biotronicists of Josef Zezulka. Our Professional Chamber has recently become a member of ANME – Association for Natural Medicine in Europe, EUAA – European Ayurveda Association and joined the European Commission's EU Health Policy Platform. We hope that our activities will contribute to the education of the professional public in the realm of CAM. Tomáš Pfeiffer Director of the Professional Chamber Sanator – the Union of Biotronicists of Josef Zezulka www.sanator.cz/en

**Contesting Islam, Constructing Race and Sexuality** Sunera Thobani 2020-12-10 The current political standoffs of the 'War on Terror' illustrate that the interaction within and between the so-called Western and Middle Eastern civilizations is constantly in flux. A recurring theme however is how Islam and Muslims signify the 'Enemy' in the Western socio-cultural imagination and have become the 'Other' against which the West identifies itself. In a unique and insightful blend of critical race, feminist and post-colonial theory, Sunera Thobani examines how Islam is foundational to the formation of

Western identity at critical points in its history, including the Crusades, the Reconquista and the colonial period. More specifically, she explores how masculinity and femininity are formed at such pivotal junctures and what role feminism has played in the wars against 'radical' Islam. Exposing these symbiotic relationships, Thobani explores how the return of 'religion' is reworking the racial, gender and sexual politics by which Western society defines itself, and more specifically, defines itself against Islam. Contesting Islam, Constructing Race and Sexuality unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development.
A President's Daily Brief: Years 1-4 Micah Fisher-Kirshner

**What was daily life under the Trump presidency really like?**

An accessible ebook with short, thematic entries showing the corruption of the entire Trump presidency, A President's Daily Brief, Year 1-4: The Day-by-Day Lurch of Trump's Norm-Breaking Presidency is the full volume of Micah Fisher-Kirshner's series, representing the four years of Trump's time in power and the subversion that occurred. More than a compiled list of significant events that portray Trump as the most corrupt American president, this digestible and scannable read of in-the-moment posts pulled from news outlets and credible sources provides an intimate look at how the administration went about breaking the presidential norms on a daily basis. Readers also will have access to citations to fact-check claims.

This quick read on a Trump presidency that started off with outrage and graduated to righteous indignation is a must-have for those who enjoy history, politics, and government or simply want to read about the most notorious

presidency in history.

**Python for Finance** Yves Hilpisch 2018-12-05 The financial industry has recently adopted Python at a tremendous rate, with some of the largest investment banks and hedge funds using it to build core trading and risk management systems. Updated for Python 3, the second edition of this hands-on book helps you get started with the language, guiding developers and quantitative analysts through Python libraries and tools for building financial applications and interactive financial analytics. Using practical examples throughout the book, author Yves Hilpisch also shows you how to develop a full-fledged framework for Monte Carlo simulation-based derivatives and risk analytics, based on a large, realistic case study. Much of the book uses interactive IPython Notebooks.

**The Tie Goes to Freedom** Helen J. Knowles 2018-10-19 At the end of Kennedy's tenure as the most important swing justice in recent Supreme Court history, Helen Knowles provides an updated edition of her highly regarded book on Justice Kennedy and his constitutional vision.

**Bhutan** International Monetary Fund. Asia and Pacific Dept 2018-10-30 This 2018 Article IV Consultation highlights that Bhutan continued to make strides in raising per capita incomes and reducing poverty as it concluded the 11th Five Year Plan in 2018. Notably, poverty declined from 12 percent in 2012 to 8.2 percent, and extreme poverty fell to just 1.5 percent. The country is poised to transition to middle-income status, with per capita incomes at nearly US$3,600 in 2018, up from US$1,100 in 2004. Growth has remained robust, averaging 6 percent over the 11th Plan. In FY2018, growth is expected to slow to 5.8 percent from 7.4 percent in FY2017, reflecting slowing construction activity of hydropower projects set to come on stream in 2018 and beyond.

Teacher Education at the Edge Tonya Huber 2019-12-01

International Education Inquiries is a book series dedicated to realizing the global vision of Education 2030. This vision involves "ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all." The founding editors seek to provide a forum for the diverse voices of scholars and practitioners from across the globe asking questions about transforming the vision of Education 2030 into a reality. Published chapters will reflect a variety of formats, free of methodological restrictions, involving disciplinary as well as interdisciplinary inquiries. We expect the series will be a leading forum for pioneers redefining the global discussion about the people, places and perspectives shaping Education 2030 outcomes. Education 2030 topics of interest include, but are not limited to, • Improving access to quality early childhood development, care, and pre-primary education; • Ensuring equal access for all women and men to affordable and quality education; • Increasing the number of youth and adults who have skills relevant for sustainable living and livelihoods; • Ensuring equal access for the vulnerable, including persons with disabilities, indigenous peoples and children in vulnerable situations; • Achieving levels of literacy and numeracy required to engage in communities and employment; • Acquiring the knowledge and skills needed to promote sustainable development, including: * Human right * Gender equality, * Promotion of a culture of peace and non-violence, * Global citizenship education, * The appreciation of cultural diversity and of culture's contributions to sustainable development, • Providing safe, non-violent, inclusive and effective learning environments for all; • Recruiting, preparing, supporting, and retaining quality teachers.
Trigger Effects in Geosystems Gevorg Kocharyan 2019-11-16 This book is the result of collaboration within the frames of the 5th International

Conference "Trigger Effects in Geosystems" held in the Institute of Geosphere Dynamics of Russian Academy of Sciences, June 2019. This book aims to raise awareness about different triggering aspects in the geosphere and its effects.The conference provided a multidisciplinary platform with a focus on (i) the influence of natural and anthropogenic factors on the geosphere, geomechanical systems and anthropogenic objects found in a subcritical state and (ii) the influence of these factors on the system "atmosphere - ionosphere". The problems considered in the book may be interesting for a wide audience including students, professionals, researches, and for the industry.

**Donald Trump and the 2018 Midterm Battle for Central New York** Luke Perry 2019-03-19 Luke Perry's inaugural Pivot in the Palgrave Studies in US Elections series examines the impact of Donald Trump on the 2018 midterm campaigns in Central New York, particularly competitive campaigns for NY-19, NY-22, and NY-24. Providing a contextual foundation for these races—considering factors such as incumbency advantage, history of party control of the seat, registered party members, statewide electoral norms, fundraising, and polling—Donald Trump and the 2018 Midterm Battle for Central New York then analyzes the positions and rhetoric of these GOP reelection campaigns, paying particular attention to the continuity and variance in relation to Trump's personal, populist, and negative campaign style. When examined alongside the results of the midterm election, the outcomes illustrated how the president hurt more than helped House GOP incumbents, revealed the quality of candidates, proved how campaigns and grassroots organizing matter, and demonstrated that moderate Democrats were more successful than progressive ones.

School Environment and

Sustainable Development Goals Beyond 2030 Princewill I. Egwuasi Ph.D 2020-06-07 This book on School Environment and the SDGs Beyond 2030 is a continuation of our maiden, second and third publications on School Environment in Nigeria and the Philippines, published in February, 2015; School Environment in Nigeria, Ghana and the Philippines published in March, 2017; and School Environment in Africa and Asia Pacific published in July, 2018. The philosophy being that since there is a shift from globalization to internationalization and to cross-border education, there is the urgent need to revisit some topical issues in our school environment towards the realization of an internationalized, qualitative and cross-border teaching and learning, using the Sustainable Development Goals as a yardstick.

**Stream Processing with Apache Spark** Gerard Maas 2019-06-05 Before you can build analytics tools to gain quick insights, you first need to know how to process data in real time. With this practical guide, developers familiar with Apache Spark will learn how to put this in-memory framework to use for streaming data. You'll discover how Spark enables you to write streaming jobs in almost the same way you write batch jobs. Authors Gerard Maas and François Garillot help you explore the theoretical underpinnings of Apache Spark. This comprehensive guide features two sections that compare and contrast the streaming APIs Spark now supports: the original Spark Streaming library and the newer Structured Streaming API. Learn fundamental stream processing concepts and examine different streaming architectures Explore Structured Streaming through

practical examples; learn different aspects of stream processing in detail Create and operate streaming jobs and applications with Spark Streaming; integrate Spark Streaming with other Spark APIs Learn advanced Spark Streaming techniques, including approximation algorithms and machine learning algorithms Compare Apache Spark to other stream processing projects, including Apache Storm, Apache Flink, and Apache Kafka Streams 929〉 2018/06/15 BP 2018-06-13 5  ◆第1 ◆第2 ◆第3 ◆第4 ◆第5

## Acquisition Trends, 2018
Rhys McCormick 2019-09-16 This report analyzes the current state of affairs in defense acquisition by combining detailed policy and data analysis to provide a comprehensive overview of the current and future outlook for defense acquisition.

## Julia Programming Projects
Adrian Salceanu 2018-12-26 A step-by-step guide that demonstrates how to build simple-to-advanced applications through examples in Julia Lang 1.x using modern tools Key FeaturesWork with powerful open-source libraries for data wrangling, analysis, and visualizationDevelop full-featured, full-stack web applications Learn to perform supervised and unsupervised machine learning and time series analysis with JuliaBook Description Julia is a new programming language that offers a unique combination of performance and productivity. Its powerful features, friendly syntax, and speed are attracting a growing number of adopters from Python, R, and Matlab, effectively raising the bar for modern general and scientific computing. After six years in the making, Julia has reached version 1.0. Now is the perfect time to learn it, due to its large-scale adoption across a wide range of domains,

including fintech, biotech, education, and AI. Beginning with an introduction to the language, Julia Programming Projects goes on to illustrate how to analyze the Iris dataset using DataFrames. You will explore functions and the type system, methods, and multiple dispatch while building a web scraper and a web app. Next, you'll delve into machine learning, where you'll build a books recommender system. You will also see how to apply unsupervised machine learning to perform clustering on the San Francisco business database. After metaprogramming, the final chapters will discuss dates and time, time series analysis, visualization, and forecasting. We'll close with package development, documenting, testing and benchmarking. By the end of the book, you will have gained the practical knowledge to build real-world applications in Julia. What you will learnLeverage Julia's strengths, its top packages, and main IDE optionsAnalyze and manipulate datasets using Julia and DataFramesWrite complex code while building real-life Julia applicationsDevelop and run a web app using Julia and the HTTP packageBuild a recommender system using supervised machine learning Perform exploratory data analysis Apply unsupervised machine learning algorithmsPerform time series data analysis, visualization, and forecastingWho this book is for Data scientists, statisticians, business analysts, and developers who are interested in learning how to use Julia to crunch numbers, analyze data and build apps will find this book useful. A basic knowledge of programming is assumed. **Knowledge Discovery in Big Data from Astronomy and Earth Observation** Petr Skoda 2020-03 Knowledge Discovery in Big Data from Astronomy and Earth Observation: Astrogeoinformatics bridges the gap between astronomy and geoscience in the context of applications, techniques and key principles of big data. Machine learning and parallel computing are increasingly

becoming cross-disciplinary as the phenomena of Big Data is becoming common place. This book provides insight into the common workflows and data science tools used for big data in astronomy and geoscience. After establishing similarity in data gathering, pre-processing and handling, the data science aspects are illustrated in the context of both fields. Software, hardware and algorithms of big data are addressed. Finally, the book offers insight into the emerging science which combines data and expertise from both fields in studying the effect of cosmos on the earth and its inhabitants.

**Chinese (Taiwan) Yearbook of International Law and Affairs, Volume 36, (2018)** 2019-12-09 Volume 36 of the Chinese (Taiwan) Yearbook of International Law and Affairs publishes scholarly articles and essays on international and transnational law, as well as compiles official documents on the state practice of the Republic of China (ROC) in 2018.

**Cyber Operations** Mike O'Leary 2019-03-01 Know how to set up, defend, and attack computer networks with this revised and expanded second edition. You will learn to configure your network from the ground up, beginning with developing your own private virtual test environment, then setting up your own DNS server and AD infrastructure. You will continue with more advanced network services, web servers, and database servers and you will end by building your own web applications servers, including WordPress and Joomla!. Systems from 2011 through 2017 are covered, including Windows 7, Windows 8, Windows 10, Windows Server 2012, and Windows Server 2016 as well as a range of Linux distributions, including Ubuntu, CentOS, Mint, and OpenSUSE. Key defensive techniques are integrated throughout and you will develop situational awareness of your network and build a complete defensive infrastructure, including log servers, network firewalls, web application firewalls, and

intrusion detection systems. Of course, you cannot truly understand how to defend a network if you do not know how to attack it, so you will attack your test systems in a variety of ways. You will learn about Metasploit, browser attacks, privilege escalation, pass-the-hash attacks, malware, man-in-the-middle attacks, database attacks, and web application attacks. What You'll Learn Construct a testing laboratory to experiment with software and attack techniquesBuild realistic networks that include active directory, file servers, databases, web servers, and web applications such as WordPress and Joomla!Manage networks remotely with tools, including PowerShell, WMI, and WinRMUse offensive tools such as Metasploit, Mimikatz, Veil, Burp Suite, and John the RipperExploit networks starting from malware and initial intrusion to privilege escalation through password cracking and persistence mechanismsDefend networks by developing operational awareness using auditd and Sysmon to analyze logs, and deploying defensive tools such as the Snort intrusion detection system, IPFire firewalls, and ModSecurity web application firewalls Who This Book Is For This study guide is intended for everyone involved in or interested in cybersecurity operations (e.g., cybersecurity professionals, IT professionals, business professionals, and students)

Pawka's Story Noel Taylor Chessé 2019-06-24 This project began several years ago as a simple family history and legacy to leave to my sons and grandchildren. Every family and generation has their unique stories to share. It's sad but true that many of these stories are lost as the participants die. We have all heard about the same old stories from the family's older folks many times and got bored with the reruns of some. I hope to preserve these tales and histories. Perhaps a harsher example is the loss of the Holocaust survivors' oral histories and the World War II veterans' stories in history.
