Identity Crisis John Sides  
2019-08-13 A gripping in-depth look at the presidential election that stunned the world Donald Trump's election victory resulted in one of the most unexpected presidencies in history. Identity Crisis provides the definitive account of the campaign that seemed to break all the political rules—but in fact didn't. Featuring a new afterword by the authors that discusses the 2018 midterms and today's emerging political trends,

this compelling book describes how Trump's victory was foreshadowed by changes in the Democratic and Republican coalitions that were driven by people's racial and ethnic identities, and how the Trump campaign exacerbated these divisions by hammering away on race, immigration, and religion. The result was an epic battle not just for the White House but about what America should be.

**Machine Interfaces** Jae-Woong Jeong 2020-03-13 Soft material-enabled electronics offer distinct advantage, over conventional rigid and bulky devices, for numerous wearable and implantable applications. Soft materials allow for seamless integration with skin and tissues due to enhanced mechanical flexibility and stretchability. Wearable devices, such as sensors, offer continuous, real-time monitoring of biosignals and movements, which can be applied in rehabilitation and diagnostics, among other applications. Soft implantable electronics offer similar functionalities, but with improved compatibility with human tissues. Biodegradable soft implantable electronics are also being developed for transient monitoring, such as in the weeks following surgery. To further advance soft electronics, materials, integration strategies, and fabrication techniques are

being developed. This paper reviews recent progress in these areas, toward the development of soft material-enabled electronics for medicine, healthcare, and human-machine interfaces.

**How to Practice Mayan Astrology** Bruce Scofield 2006-11-27 A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time

and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

*Censored 2020* Andy Lee

Roth 2019-10-08 In the midst of Trump's attacks on the media, comes this look at the rigorous, independent reporting of the year's most underreported news stories. While the country's president displays a brazen disregard for the First Amendment and routinely demonizes the press as "the enemy of the people," *Censored 2020* looks beyond Donald Trump's dizzying contempt for the truth to clarify the corporate media's complicity in misinforming the American public--while also providing a clear vision of a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, *Censored 2020* focuses the public's attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media's systemic blind spots while highlighting the crucial role played by

independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year's lowlights in "junk food news" and "news abuse"-- further revealing how corporate news often functions as propaganda--as well as highlights of exemplary organizations that champion "Media Democracy in Action." Additional chapters address the importance of constructive journalism, the untold story of Kashmir, news coverage of LGBTQ issues in the Trump era, "fake news" as a Trojan horse for censorship, and online memes as a form of political communication.

**WHO Expert Committee on Biological Standardization** WORLD HEALTH ORGANIZATION. 2019-08-14 This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the

adoption of international recommendations for the production and control of vaccines and other biological substances, and the establishment of international biological reference materials. Following a brief introduction, the report summarizes a number of general issues brought to the attention of the Committee. The next part of the report, of particular relevance to manufacturers and national regulatory authorities, outlines the discussions held on the development and adoption of new and revised WHO Recommendations, Guidelines and guidance documents. Following these discussions, WHO Recommendations to assure the quality, safety and efficacy of recombinant hepatitis E vaccines; WHO Guidelines for the safe development and production of vaccines to human pandemic influenza viruses and influenza

viruses with pandemic potential; and WHO Guidelines for the safe production and quality control of poliomyelitis vaccines were adopted on the recommendation of the Committee. In addition, a WHO questions-and-answers guidance document on the evaluation of similar biotherapeutic product (SBPs) was also adopted with the Committee recommending that it be posted on the WHO website. Subsequent sections of the report provide information on the current status, proposed development and establishment of international reference materials in the areas of: antibiotics; blood products and related substances; cellular and gene therapies; in vitro diagnostics; standards for use in public health emergencies; and vaccines and related substances. A series of annexes are then presented which include an updated list of all WHO

Recommendations, Guidelines and other documents on biological substances used in medicine (Annex 1). The above three WHO documents adopted for publication on the advice of the Committee are then presented as part of this report (Annexes 2-4). Finally, all additions and discontinuations made during the 2018 meeting to the list of International Standards, Reference Reagents and Reference Panels for biological substances maintained by WHO are summarized in Annex 5

**Offshore Renewable Energy: Ocean Waves, Tides and Offshore Wind**

Eugen Rusu 2019-02-11  
This book is a printed edition of the Special Issue "Offshore Renewable Energy: Ocean Waves, Tides and Offshore Wind" that was published in Energies Teacher Education in the 21st Century Reginald Monyai 2019-05-02 A learner-centred curriculum provides space for the learner to be actively involved in knowledge production and learning. Such can only happen if the learner's confidence is boosted by a feeling of control and ability to manage his or her progress towards acquiring a qualification. The twenty-first century teacher must create an environment that not only supports the Four Pillars of Learning but also leads to learners being

allowed a voice to ask pertinent questions. The teacher should be able to guide the student to full physical and mental maturity and should help to develop critical thinking, and the students should be encouraged to practice the truth and have self-respect and respect for other people. This can happen if the learner is afforded the opportunity to self-accept. If the learners fail to do so, they are likely to have lack of confidence, which will lead to lack of independence.

**Thinking Past 'Post-9/11'**

Jayana Jain 2021-07-29 This book offers new ways of constellating the literary and cinematic delineations of Indian and Pakistani Muslim diasporic and

migrant trajectories narrated in the two decades after the 9/11 attacks. Focusing on four Pakistani English novels and four Indian Hindi films, it examines the aesthetic complexities of staging the historical nexus of global conflicts and unravels the multiple layers of discourses underlying the notions of diaspora, citizenship, nation and home. It scrutinises the "flirtatious" nature of transnational desires and their role in building glocal safety valves for inclusion and archiving a planetary vision of trauma. It also provides a fresh perspective on the role of Pakistani English novels and mainstream Hindi films in tracing the multiple origins and shifts in national xenophobic practices, and negotiating multiple modalities of political and cultural belonging. It discusses various books and films including *The Reluctant Fundamentalist*, *Burnt Shadows*, *My Name is*

Khan, New York, Exit West, Home Fire, AirLift and Tiger Zinda Hai. In light of the twentieth anniversary of 9/11 attacks, current debates on terror, war, paranoid national imaginaries and the suspicion towards migratory movements of refugees, this book makes a significant contribution to the interdisciplinary debates on border controls and human precarity. A crucial work in transnational and diaspora criticism, it will be of great interest to researchers of literature and culture studies, media studies, politics, film studies, and South Asian studies.

*Green Finance, Sustainable Development and the Belt and Road Initiative* Fanny M. Cheung

2020-12-22 Can China's Belt and Road Initiative (BRI) promote sustainable development, alongside its primary aims of increasing commercial connectivity with China's partners? In discussions of the BRI the focus has

tended to be on the implications for infrastructure construction, connectivity, and economic diplomacy. Rather less attention has been paid to its potential impact on sustainability. The initiative has not only set principles to prevent climate change and promote sustainable development, but also pledged to align with the UN's environmental objectives. The contributors to this volume describe and evaluate the consequent policy coordination in the areas of green finance, green energy, and sustainable development in the Belt and Road regions. They examine both the challenges and opportunities of these projects, and the role that Hong Kong can play in supporting their assessment, finance, and implementation. With contributions from authors based in mainland China, Hong Kong, Australia, Qatar, the UK, and the US -

A valuable resource for scholars of the BRI and its many implications for China, its partners, and the development of sustainable infrastructure.

**The Voice Catchers** Joseph Turow 2021-05-18 Your voice as biometric data, and how marketers are using it to manipulate you Only three decades ago, it was inconceivable that virtually entire populations would be carrying around wireless

phones wherever they went, or that peoples' exact locations could be tracked by those devices. We now take both for granted. Even just a decade ago the idea that individuals' voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel. Yet a new business sector is emerging to do exactly that. The first in-depth examination of the voice intelligence industry, *The Voice Catchers* exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis. Amazon and Google have numerous patents pertaining to voice profiling, and even now their smart speakers are extracting and using voice prints for identification and more. Customer service centers are already approaching every caller based on what they

conclude a caller's voice reveals about that person's emotions, sentiments, and personality, often in real time. In fact, many scientists believe that a person's weight, height, age, and race, not to mention any illnesses they may have, can also be identified from the sound of that individual's voice. Ultimately not only marketers, but also politicians and governments, may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole. Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective, explores its contemporary developments, and offers a clarion call for regulating this rising surveillance regime.

**The European Environmental Conscience in EU Politics**

Thomas Hoerber  
2021-12-07 Based on empirical studies of European energy and environmental policies, this book suggests that, in combination, these two policy fields form a

consensus in the EU which might also become the basis for a new European ideology, namely European 'sustainability'. It asks why an environmental conscience has grown since the late 1960s in the industrialised world and shows that whilst there is undeniable environmental degradation during this time, and that a European environmental conscience has mainly developed through successive steps of European integration in energy policy. In this connection between energy and the environment we find one driver for European integration and indeed European identity. If sustainability should become a European ideology, it will substantially influence the way future Europeans will live. This book will be of key interest to scholars and students of European Studies, International Relations, Political Science, History, Economics,

Unhomely Empire Onni Gust 2020-11-12 This book examines the role of Scottish Enlightenment ideas of belonging in the construction and circulation of white supremacist thought that sought to justify British imperial rule. During the 18th century, European imperial expansion radically increased population mobility through the forging of new trade routes, war, disease, enslavement and displacement. In this book, Onni Gust argues that this mass movement intersected with philosophical debates over what it meant to belong to a nation, civilization, and even humanity itself. Unhomely Empire maps the consolidation of a Scottish Enlightenment discourse of 'home' and 'exile' through three inter-related case studies and debates; slavery

and abolition in the Caribbean, Scottish Highland emigration to North America, and raising white girls in colonial India. Playing out over poetry, political pamphlets, travel writing, philosophy, letters and diaries, these debates offer a unique insight into the movement of ideas across a British imperial literary network. Using this rich cultural material, Gust argues that whiteness was central to 19th-century liberal imperialism's understanding of belonging, whilst emotional attachment and the perceived ability, or inability, to belong were key concepts in constructions of racial difference.

### **Expected Date of**

### **Departure** Olubusola

Eshiet 2021-04-09 The thought of losing a loved one evokes fear. Few will admit that they think of it, fewer still want to talk about it. But bereavement is an everyday occurrence and will happen to everyone who lives long enough. Be

proactive: Expected Date of Departure encourages you to prepare yourself for loss and to choose your response in advance. Action-based: Expected Date of Departure gives you permission to think about the inevitable death of loved ones, talk about it, and to plan for grief before it happens. Preparing for loss does not bring on bad luck nor does it cause fear; instead, it can make our world a more delightful place to live in. If you thought you might never get to speak to your friend again after your ongoing discussion with her, would it make any difference in the way you carry on with the conversation? Would you be more attentive, more thoughtful of the responses you give? Likely, yes. There will be more loving and caring if we relate to our loved ones with the end in mind. And if we happen to lose them, we will live on with the satisfaction that there were no unfinished

businesses in our relationships. Reviews Thank you for being vulnerable and opening your heart in this way. Your book has touched on sensitive places in my heart; reading it has made me come face-to-face with my fear of losing my loved ones - to challenge that fear and begin my healing journey. - ChiChi Nwosu, Sydney, Australia Captivating, needful, and relatable. Most of us do not prepare for the departure of our loved ones if they pre-decease us. Busola has written a book that gives practical tips on how to prepare, using real-life experiences of friends and family and her own experience of losing loved ones. The book discusses death in a way that the subject does not come across as morbid. Instead, it encourages us to break the silence surrounding the issue with sensitivity, understanding, and empathy. - Ibiba Chidi, Houston, Texas This book is

brilliant, It made me laugh and cry, it left me pondering many a question. Very important issues raised, and I love how much of the Word of God Busola has included. Really well written. In my head, it was just like she talking to me as I read. Busola has put a lot of herself into this book and I pray that it helps many. - Sarah Macmanus, Newcastle upon Tyne, UK. An unusual slant to everyday reality. It is still a hard reality for me to face, but face it we must. Yes, we mourn the loss of loved ones, but we are not driven to despair, as we will meet again. This book inspires us to take steps to appreciate the people in our lives every day. Thank you Busola, for this push to prepare for the inevitable. - Abimbola Olufemi, Lagos, Nigeria I like Busola's boldness in confronting this matter. It's a subject that Nigerians, even Christians, avoid, with the crisp phrase 'not my portion'. Preparation will

help people to set their relationships in order. - Ijeoma Okafor John-Chieme. Abuja, Nigeria I find this book to be a valuable cross-cultural resource for starting conversations around the subjects of life and death. It is rich with personal experiences and scriptural insights. It gave me the rare luxury to pause and shed a few private tears in the loving memory of my dear parents. - Semedetun Ilo, Lethbridge, Canada. Everyone goes through the problem of the fear of bereavement, but no one wants to verbalise it. I must commend Busola for her ability to capture in words those feelings that a lot of people who have experienced loss find difficult to explain. - Sunday Udoh, Abidjan, Cote d'Ivoire The book is weighty but not heavy and it has given me this take home message, which is don't live with regrets so that when the news comes of a loved one's death, we will be able to

grieve as those who have hope. I loved the cross-continent perspective (Busola is Nigerian-born, now living in the UK) that actually made the subject matter more palatable for me. - Alison Bowie, Newcastle upon Tyne, UK.

with, you will quickly set up a deep learning environment by installing the Keras library. Through each of the projects, you will explore and learn the advanced concepts of deep learning and will learn how to compute and run your deep learning models using the advanced offerings of Keras. You will train fully-connected multilayer networks, convolutional neural networks, recurrent neural networks, autoencoders and generative adversarial networks using real-world training datasets. The projects you will undertake are all based on real-world scenarios of all complexity levels, covering topics such as language recognition, stock volatility, energy consumption prediction, faster object classification for self-driving vehicles, and more. By the end of this book, you will be well versed with deep learning and its implementation with Keras. You will have all the

knowledge you need to train your own deep learning models to solve different kinds of problems. What you will learn Apply regression methods to your data and understand how the regression algorithm works Understand the basic concepts of classification methods and how to implement them in the Keras environment Import and organize data for neural network classification analysis Learn about the role of rectified linear units in the Keras network architecture Implement a recurrent neural network to classify the sentiment of sentences from movie reviews Set the embedding layer and the tensor sizes of a network Who this book is for If you are a data scientist, machine learning engineer, deep learning practitioner or an AI engineer who wants to build speedy intelligent applications with minimal lines of codes, then this book is the best fit for you.

Leverage the power of PostgreSQL 11 to build powerful database and data warehousing applications  
Key Features Monitor, secure, and fine-tune your PostgreSQL 11 database  
Learn client-side and server-side programming using SQL and PL/pgSQL  
Discover tips on implementing efficient database solutions  
Book Description PostgreSQL is

one of the most popular open source database management systems in the world, and it supports advanced features included in SQL standards. This book will familiarize you with the latest features in PostgreSQL 11, and get you up and running with building efficient PostgreSQL database solutions from scratch. Learning PostgreSQL, 11 begins by covering the concepts of relational databases and their core principles. You'll explore the Data Definition Language (DDL) and commonly used DDL commands supported by ANSI SQL. You'll also learn how to create tables, define integrity constraints, build indexes, and set up views and other schema objects. As you advance, you'll come to understand Data Manipulation Language (DML) and server-side programming capabilities using PL/pgSQL, giving you a robust background to

develop, tune, test, and troubleshoot your database application. The book will guide you in exploring NoSQL capabilities and connecting to your database to manipulate data objects. You'll get to grips with using data warehousing in analytical solutions and reports, and scaling the database for high availability and performance. By the end of this book, you'll have gained a thorough understanding of PostgreSQL 11 and developed the necessary skills to build efficient database solutions. What you will learn Understand the basics of relational databases, relational algebra, and data modeling Install a PostgreSQL server, create a database, and implement your data model Create tables and views, define indexes and stored procedures, and implement triggers Make use of advanced data types such as Arrays, hstore, and

JSONBConnect your Python applications to PostgreSQL and work with data efficientlyIdentify bottlenecks to enhance reliability and performance of database applicationsWho this book is for This book is for you if you're interested in learning about PostgreSQL from

scratch. Those looking to build solid database or data warehousing applications or wanting to get up to speed with the latest features of PostgreSQL 11 will also find this book useful. No prior knowledge of database programming or administration is required to get started.
