Covid-19 Memorabilia Jack LIU 2020-10-09 This book has two aims, first of which is to try to trace and recode

all the important world-wide incident & accident that related to outbreak and pandemic of Covid-19, from Oct 1, 2019 to Sep 30 2020, with emphasis on China and United State; second of which is to render reader some clue that helps answering very important questions. Those questions are: where is new corona virus come from? Is it developed naturally from some bat in some mountain or man-made from some lab? How easy is the virus to invade human cells? When and where and how the viruses enter into human society? How do them mutated and getting more contagious? Are mutated virus more vicious or getting friendly and benign to human body? How the epidemic spread to the world and cause pandemic? How the pandemic influence the economy, domestic and global? Is globalization still has future? How will pandemic influence China-U.S. relationship? Is the

Pandemic changing the international political order? You won't get all the answer here, since this book is about First Wave only.

EIB Working Papers 2019/10 - Structural and cyclical determinants of access to finance

European Investment Bank 2020-02-14 Egyptian firms face significant access to finance constraints. Using panel data, this paper examines the reasons why many Egyptian firms do not use formal banking services. Using data on the location of firms and bank branches, it also investigates whether access to finance constraints are linked to the crowding-out effect of bank investments in government debt.

Blade Runner 2019 #10
Michael Green 2020-09-23
Eight years ago, Blade Runner Aahna Ashina, 'Ash',

fled to the Off-world mining colony with Cleo, the daughter of business tycoon Alexander Selwyn, when she learned of Selwyn's plan to sell his own daughter to Eldon Tyrell for genetic experimentation. Ash helped Cleo and her surrogate Replicant mother, Isobel, escape to the off-world colony of Arcadia. She has now returned to Los Angeles to hunt down Selwyn once and for all. With the help of her old boss, Wojciech, Ash visited the ruins of the Tyrell Corporation and discovered a deranged scientist called Fost, living and working in the ruins on a secret project designated: Project Isobel. With Fost's help, Ash accessed the Tyrell mainframe and discovered the location of Alexander Selwyn. Meanwhile, Selwyn, alerted to Ash's investigation, has activated a new version of the Blade Runner, Hythe, whom Ash killed back on the waystation of Ramanuja.

THE PORCHLIGHT BUSINESS BOOK AWARD Social media connected the world—and gave rise to fake news and increasing polarization. It is paramount, MIT professor Sinan Aral says, that we recognize the outsize effect social media has on us—on our politics, our economy, and even our personal health—in order to steer today’s social technology toward its great promise while avoiding the ways it can pull us apart. Drawing on decades of his own research and business experience, Aral goes under the hood of the most powerful social networks to tackle the critical question of just how much social media actually shapes our choices, for better or worse. He shows how the tech behind social media offers the same set of behavior influencing levers to everyone who hopes to change the way we think and act—from Russian hackers to brand marketers—which is why its

consequences affect everything from elections to business, dating to health. Along the way, he covers a wide array of topics, including how network effects fuel Twitter’s and Facebook’s massive growth, the neuroscience of how social media affects our brains, the real consequences of fake news, the power of social ratings, and the impact of social media on our kids. In mapping out strategies for being more thoughtful consumers of social media, *The Hype Machine* offers the definitive guide to understanding and harnessing for good the technology that has redefined our world overnight.

Incident response is critical for the active defense of any network, and incident responders need up-to-date, immediately applicable techniques with which to engage the adversary. Applied Incident Response details effective ways to respond to advanced attacks against local and remote network resources, providing proven response techniques and a framework through which to apply them. As a starting point for new incident handlers, or as a technical reference for hardened IR veterans, this book details the latest techniques for responding to threats against your network, including: Preparing your environment for effective incident response Leveraging MITRE ATT&CK and threat intelligence for active network defense Local and remote triage of systems using PowerShell, WMIC, and open-source tools Acquiring RAM and disk images locally and remotely Analyzing RAM

with Volatility and Rekal Deep-dive forensic analysis of system drives using open-source or commercial tools Leveraging Security Onion and Elastic Stack for network security monitoring Techniques for log analysis and aggregating high-value logs Static and dynamic analysis of malware with YARA rules, FLARE VM, and Cuckoo Sandbox Detecting and responding to lateral movement techniques, including pass-the-hash, pass-the-ticket, Kerberoasting, malicious use of PowerShell, and many more Effective threat hunting techniques Adversary emulation with Atomic Red Team Improving preventive and detective controls *Circular Series A. 1968* **Doomsday Clock (2017-2019) #10** Geoff Johns 2019-05-29 This stunning issue of the critically acclaimed hit maxiseries reveals the secrets behind Dr. Manhattan and his

The Meritocracy Trap Daniel Markovits 2019-09-10
A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the

meritocratic ideal – that social and economic rewards should follow achievement rather than breeding – reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive

educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside

the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.
