The Anti-Feminist Component of Lone Wolf Terrorism Myriam Kim Schick 2020-10-15
Seminar paper from the year 2020 in the subject Politics - International Politics - General and Theories, grade: 1,0, University of Cologne, language: English, abstract: The aim of this paper is to highlight the misogyny of the extreme right and examine the online spaces in which lone wolves radicalize themselves. In particular the 'Incel' movement which has gained notoriety in recent years with multiple domestic terrorist attacks, many of them targeted toward women, across the world. The goal is to show that alt-right and Incel

ideologies often go hand in hand. There is a misogynist and an anti-feminist agenda that runs like a red thread through the manifests of extreme right attackers and still, there is almost no public discussion addressing it. Since the intent of this paper is to show connections between extreme right and Incel ideologies we will first make sense of the Incel movement as a whole and the so called 'Manosphere'. Subsequently, we will examine the similar characteristics of the Incel and extreme right world view, and have a look at three case studies of recent domestic terrorist attacks, examine their motive, their underlining ideologies and discuss whether its perpetrators can be ascribed to both the extreme right and the Incel community.

Karl Polanyi and the Contemporary Political Crisis Peadar Kirby 2020-12-10
Has politics reached breaking point? Rather than defending liberalism or abandoning it, how can a socially just and ecological alternative be built? Peadar Kirby investigates the causes of our current multifaceted global crisis by drawing on the work of Karl Polanyi. This book explores Polanyi's theory that social disruptions result from the attempt to run society according to the rules of the market. Drawing on these ideas, it outlines pathways towards an alternative future that overcome weaknesses in Marxism. Linking the ecological, political and socio-economic

crises, Kirby identifies that an alternative socio-ecological model is emerging, consistent with the insights of Polanyi. Karl Polanyi and the Contemporary Political Crisis is an urgent intervention into key debates on the future of politics, on the low-carbon transition, on automation and on the emerging world order.

Blade Runner 2019 #11 Michael Green 2020-10-21 Having helped Cleo – the daughter of business tycoon Alexander Selwyn – and her surrogate Replicant mother, Isobel, escape Off-world, Blade Runner Aahna 'Ash' Ashina has returned to Los Angeles to hunt Selwyn down. Following a lead, Ash visited the ruins of the Tyrell Corporation. With the help of a deranged scientist called Fost, whom she found living there, she accessed the Tyrell mainframe and uncovered a list of people connected to a secret project called Isobel. Believing the list would lead her to Selwyn, Ash set off in her borrowed Spinner to follow the trail. However, following a tip-off from Selwyn, a squadron of LAPD Spinners were lying in wait for Ash, and she was arrested. Whilst transporting her to prison, the police were ambushed, and Ash was freed and taken to a deserted farmhouse by members of the Replicant Resistance.

What's Your Can? Update 2019: 11 Strategies for Living a Spectacular Life with a Chronic Condition Maribeth

Slovasky 2019-11-25 A year has passed, and the story continues to unfold as the author continues her transformation from "living with a chronic condition" to "being on an expedition that keeps me believing in others and in myself." Regardless of what it is or how long you have had one, a chronic condition alters your life in many ways. When every action requires thought and planning, giving up sounds like a good option. There are solutions! What's Your Can? is author Maribeth Slovasky's story of her 40-year journey with a chronic condition. She takes you through the progression of her illness, sharing how her struggles nearly incited her yearning to resign herself to life with restrictions and constant concern regarding her wellbeing. She didn't quit. Even more so, a surreal experience in Tacoma, Washington, presented Maribeth with a choice; become who you want to be or live behind the black wall, alone, declining, and unhappy. Follow Ms. Slovasky's journey as she revives her passion for writing. After meeting new friends and learning to trust again, she embarks on an expedition to become physically and emotionally healthier than she thought possible. This book is designed for those readers who struggle with a chronic or long-lasting condition and are ready to live the life they deserve. Her 11 lessons are practical, fun, and thought-provoking ideas to give even the long term sufferer the belief they have been seeking. Family, caregivers, and friends: this book will help you learn along with your loved one, finding new ways to be mindful, calm, and positive, even in your own life.

Friendly Neighborhood Spider-Man Vol. 1

Tom Taylor 2019-07-10 Collects Friendly Neighborhood Spider-Man (2019) #1-5. Spider-Man is the worst neighbor ever! There are always crazy villains and property damage and drama and...and he catches those villains. And he tries to fix the damage. And he helps carry your groceries. And actually that property damage keeps the rents down. You know what? Spider-Man is the best neighbor ever, and this book will give you a closer look at Spider-Man's (and Peter Parker's) neighborhood than any before it! But it wouldn't be a Spider-Man adventure without a threat that could destroy not only Spider-Man, but also all his friendly neighbors — and it's going to take him far from home, to a part of the Marvel Universe you've never seen before! Plus: Aunt May has a shocking secret that could change everything for Peter and his family!

Design and Development of Efficient Energy Systems Suman Lata Tripathi 2021-04-13 There is not a single industry which will not be transformed by machine learning and Internet of Things (IoT). IoT and machine learning have altogether changed the technological scenario by letting the user monitor and control things based on the prediction made by machine learning

algorithms. There has been substantial progress in the usage of platforms, technologies and applications that are based on these technologies. These breakthrough technologies affect not just the software perspective of the industry, but they cut across areas like smart cities, smart healthcare, smart retail, smart monitoring, control, and others. Because of these "game changers," governments, along with top companies around the world, are investing heavily in its research and development. Keeping pace with the latest trends, endless research, and new developments is paramount to innovate systems that are not only user-friendly but also speak to the growing needs and demands of society. This volume is focused on saving energy at different levels of design and automation including the concept of machine learning automation and prediction modeling. It also deals with the design and analysis for IoT-enabled systems including energy saving aspects at different level of operation. The editors and contributors also cover the fundamental concepts of IoT and machine learning, including the latest research, technological developments, and practical applications. Valuable as a learning tool for beginners in this area as well as a daily reference for engineers and scientists working in the area of IoT and machine technology, this is a must-have for any library.

EIB Working Papers 2019/11 - Macro-based asset allocation European Investment Bank 2020-02-14 Macro-based asset allocation is based on the identification of turning points in macro-financial cycles. This paper suggests that macro-based asset allocation informed by trends in continuous business and financial cycle indicators could be a promising alternative for medium- and long-term investment strategies. Despite changes during the last three decades, the most promising specifications of this approach did roughly anticipate turning points in asset price cycles, implying favourable returns and low portfolio volatility.

Utopian Universities Miles Taylor

2020-11-12 In a remarkable decade of public investment in higher education, some 200 new university campuses were established worldwide between 1961 and 1970. This volume offers a comparative and connective global history of these institutions, illustrating how their establishment, intellectual output and pedagogical experimentation sheds light on the social and cultural topography of the long 1960s. With an impressive geographic coverage - using case studies from Europe, the Americas, Africa and Asia - the book explores how these universities have influenced academic disciplines and pioneered new types of teaching, architectural design and student experience.

From educational reform in West Germany to the establishment of new institutions with progressive, interdisciplinary curricula in the Commonwealth, the illuminating case studies of this volume demonstrate how these universities shared in a common cause: the embodiment of 'utopian' ideals of living, learning and governance. At a time when the role of higher education is fiercely debated, *Utopian Universities* is a timely and considered intervention that offers a wide-ranging, historical dimension to contemporary predicaments.

Freedom Fighters (2018-2019) #11

Robert Venditti 2019-11-27 The final battle for the fate of Earth-X has begun, and the last charge of the Freedom Fighters is underway! The team may have bested the defenses of the Nazi stronghold of Cheyenne Mountain, but now our heroes must face off against the combined might of the newly reconstructed Cyborg Overman, the evil Plasstic Men, and the psychotic Hitler III! The odds are against the red, white, and blue, but Uncle Sam has a plan - don't miss this penultimate issue in the Freedom Fighters saga!

The AI Economy Roger Bootle 2019-09-05 'A well-researched, enjoyable and thoughtful book'. - Calum Chace, Forbes Extraordinary innovations in technology promise to transform the world, but how realistic is the claim that AI will change our lives? In this much needed book the acclaimed economist Roger Bootle responds to the fascinating economic questions posed by the age of the robot, steering a path away from tech jargon and alarmism towards a rational explanation of the ways in which the AI revolution will affect us all. Tackling the implications of Artificial Intelligence on growth, productivity, inflation and the distribution of wealth and power, *THE AI ECONOMY* also examines coming changes to the way we educate, work and spend our leisure time. A fundamentally optimistic view which will help you plan for changing times, this book explains AI and leads you towards a more certain future.
