MLI Made Easy Kuldeep Sharma 2021-04-22 The Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) provides an innovative approach to enable countries to swiftly modify their bilateral tax treaties in order to implement measures developed in the course of the Base Erosion and Profit Shifting (BEPS) Project. MLI, the first successfully concluded multilateral tax treaty, provides jurisdictions with the tools they need to ensure that profits are taxed where economic activities generating the profits are performed, while at the same time giving businesses greater certainty. MLI Made Easy makes it easier to get a complete grasp of this swift but complex modification process of tax treaties. This first and only self-contained book offers an unmatched article-by-article discussion of the MLI with an abundance of practical examples, diagrams, and flowcharts to make the information easier to understand and apply.

Focusing on measures to combat tax evasion and abuse of tax treaties arising due to artificial avoidance of a permanent establishment status, hybrid mismatch arrangements, and other aspects of taxation, the book includes an in-depth discussion of the following and more: how specific gaps in existing bilateral tax treaties are addressed by the MLI; positions taken by selected jurisdictions and their impact on treaties; compatibility clauses, notification clauses, opting-in mechanisms, alternative provisions, and reservations; experiences in the course of implementation of the MLI; misconceptions and lingering doubts in respect of various substantive and procedural provisions of the MLI; interaction between the principal purpose test and simplified limitation on benefits; improving dispute resolution; and meaning of the phrases 'on or after', 'other taxes', and interpretational issues in entry into effect provisions. Adopted by a majority of jurisdictions worldwide, MLI preserves the tax sovereignty of its Parties and has been successful in overcoming barriers to the conclusion of a worldwide multilateral tax treaty. Because this easy-to-use book immensely facilitates understanding and application of the treaty measures developed in the course of the BEPS Project, it will be of immeasurable use to practitioners and other professionals engaging in international taxation, as well as to taxation authorities and interested academics in any part of the world.

Consolidation des comptes (Règlement ANC 2020-01 et Normes IFRS) - Manuel + 50 applications corrigées + 36 études de cas corrigées Chérif-Jacques Allali 2021-01-01 Ce

manuel est principalement destiné aux étudiants qui préparent l'UE 4 « Comptabilité et audit » du DSCG (Diplôme supérieur de comptabilité et gestion). Il s'adresse également aux étudiants des formations universitaires qui ont inclus les normes comptables internationales et la Consolidation des comptes dans leur programme (Master CCA, par exemple) ainsi qu'aux étudiants des Ecoles supérieures de gestion et de commerce. Cet ouvrage a pour ambition de traiter toutes les difficultés liées à la Consolidation des comptes dans une optique méthodologique, en proposant notamment des tableaux d'analyse et des modèles de résolution. Son objet est de présenter de manière pédagogique les règles et les méthodes applicables aux comptes consolidés des groupes dans le cadre du règlement ANC 2020-01 et des normes comptables internationales actuellement en vigueur dans l'Union européenne. La structure de ce manuel a été choisie pour aborder l'étude de la consolidation des comptes de manière méthodique, progressive et approfondie. Le format qui a été adopté par l'auteur permet de présenter la mise en œuvre d'un système comptable en « double partie double » de manière synoptique. La consolidation des comptes nécessite en effet la mise en place d'un système comptable en « double partie double », c'est-à-dire un système dans lequel les comptes de gestion (charges et produits) sont retraités conjointement avec le compte de bilan « Résultat » correspondant (le résultat étant soit celui de la société mère, soit celui d'une autre entité intégrée). De nombreux exemples, auxquels s'ajoutent 51 applications corrigées et 36 études de cas corrigées illustrent les différentes parties de ce manuel. Ils sont traités dans le cadre de la réglementation française (règlement ANC 2020-01, code de commerce et règlement ANC 2014-03) et dans le cadre des normes IFRS adoptées et actives au sein de l'Europe. Dans cet ouvrage, l'étude comparative entre le règlement ANC 2020-01 et les normes IFRS est systématique : - pour la détermination du périmètre et des méthodes de consolidation ; - pour les retraitements de pré-consolidation ; - pour les retraitements de consolidation proprement dite ; - pour la présentation et l'analyse des états financiers. Les deux parties « Normes internationales » et « Comptes de

groupe » du programme de l'UE 4 « Comptabilité et audit » du DSCG représentent désormais plus de la moitié des points de l'épreuve. C'est pourquoi nous publions les trois livres numériques complémentaires suivants, disponibles sur Google Play livres : - Comptabilité approfondie – Manuel et 150 applications corrigées - Annales de Consolidation des comptes au DSCG et au DESCF de 1995 à 2020 (Règlement ANC 2020-01 et Normes IFRS) - 50 cas corrigés de Consolidation des comptes (Règlement ANC 2020-01 et Normes IFRS)

EIB Working Papers 2020/01 - How Can Favourable Financing Improve Energy Efficiency Investments? Pauline Ravillard 2020 Financial instruments and technical assistance are effective in increasing investments in energy efficiency. When these favourable conditions are combined, the probability that firms invest in energy efficiency increases by more than a third. These results provide important insights into measures to increase energy efficiency investments, and how to optimally design them, which is key for EU policy-makers and lending institutions.

Complexity in Economic and Social Systems

Stanisław Drożdż 2021-05-11 There is no term that better describes the essential features of human society than complexity. On various levels, from the decision-making processes of individuals, through to the interactions between individuals leading to the spontaneous formation of groups and social hierarchies, up to the collective, herding processes that reshape whole societies, all these features share the property of irreducibility, i.e., they require a holistic, multi-level approach formed by researchers from different disciplines. This Special Issue aims to collect research studies that, by exploiting the latest advances in physics, economics, complex networks, and data science, make a step towards understanding these economic and social systems. The majority of submissions are devoted to financial market analysis and modeling, including the stock and cryptocurrency markets in the COVID-19 pandemic, systemic risk quantification and control, wealth condensation, the innovation-related performance of companies, and more. Looking more at societies, there are papers that deal with regional development, land speculation, and the fake news-fighting strategies, the issues which are of central interest in contemporary society. On top of this, one of the contributions proposes a new, improved complexity measure.

political and journalistic sources. Tracing what has been produced since 1979 in parallel, he argues for a consistent pattern of mutual misrepresentation, whereby each frames its counterpart as the 'Other' to which a specific political agenda can be justified and advanced. The book covers key events including the Iranian Revolution, the invasion of Kuwait in 1990, the Taliban war, the fall of Saddam, the Arab Spring, the rise of Mohammed bin Salman, and the war on ISIS. While until now Saudi-Iranian rivalry has been understood in primarily sectarian or geopolitical terms, the author argues here that the discursive othering serves as a propagandist function that supports more fundamental political and geopolitical considerations.
