intelligence and intensity ultimately won her the acceptance of the male medical establishment. In 1849, she became the first woman in America to receive an M.D. She was soon joined in her iconic achievement by her younger sister, Emily, who was actually the more brilliant physician. Exploring the sisters' allies, enemies, and enduring partnership, Janice P. Nimura presents a story of trial and triumph. Together, the Blackwells founded the New York Infirmary for Indigent Women and Children, the first hospital staffed entirely by women. Both sisters were tenacious and visionary, but their convictions did not always align with the emergence of women's rights—or with each other. From Bristol, Paris, and Edinburgh to the rising cities of antebellum America, this richly researched new biography celebrates two complicated pioneers who exploded the limits of possibility for women in

medicine. As Elizabeth herself predicted, "a hundred years hence, women will not be what they are now."

The Copenhagen Trilogy

Tove Ditlevsen

2021-01-26 A New York Times 10 Best Books of the Year (2021) An NPR Best Books of the Year (2021) Called "a masterpiece" by The New York Times, the acclaimed trilogy from Tove Ditlevsen, a pioneer in the field of genre-bending confessional writing.

Tove Ditlevsen is today celebrated as one of the most important and unique voices in twentieth-century Danish literature, and *The Copenhagen Trilogy* (1969-71) is her acknowledged masterpiece. *Childhood* tells the story of a misfit child's

minded determination to become a poet; Youth describes her early experiences of sex, work, and independence. Dependency picks up the story as the narrator embarks on the first of her four marriages and goes on to describe her horrible descent into drug addiction, enabled by her sinister, gaslighting doctor-husband. Throughout, the narrator grapples with the tension between her vocation as a writer and her competing roles as daughter, wife, mother, and drug addict, and she writes about female experience and identity in a way that feels very fresh and pertinent to today's discussions around feminism. Ditlevsen's trilogy is remarkable for its intensity and its immersive depiction of a world of complex female friendships, family and growing up—in this sense, it's Copenhagen's answer to Elena Ferrante's Neapolitan Novels. She can also be seen as a spiritual forerunner of

confessional writers like Karl Ove Knausgaard, Annie Ernaux, Rachel Cusk and Deborah Levy. Her trilogy is drawn from her own experiences but reads like the most compelling kind of fiction. Born in a working-class neighborhood in Copenhagen in 1917, Ditlevsen became famous for her poetry while still a teenager, and went on to write novels, stories, and memoirs. Having been dismissed by the critical establishment in her lifetime as a working-class female writer, she is now being rediscovered and championed as one of Denmark's most important modern authors.

Time Series Analysis with Python Cookbook Tarek A. Atwan 2022-06-30 Perform time series analysis and forecasting confidently with this Python code bank and reference manual Key Features Explore forecasting and anomaly detection techniques using statistical, machine learning, and deep learning algorithms

Learn different techniques for evaluating, diagnosing, and optimizing your models Work with a variety of complex data with trends, multiple seasonal patterns, and irregularities Book Description Time series data is everywhere, available at a high frequency and volume. It is complex and can contain noise, irregularities, and multiple patterns, making it crucial to be well-versed with the techniques covered in this book for data preparation, analysis, and forecasting. This book covers practical techniques for working with time series data, starting with ingesting time series data from various sources and formats, whether in private cloud storage, relational databases, non-relational databases, or specialized time series databases such as InfluxDB. Next, you'll learn strategies for handling missing data, dealing with time zones

and custom business days, and detecting anomalies using intuitive statistical methods, followed by more advanced unsupervised ML models. The book will also explore forecasting using classical statistical models such as Holt-Winters, SARIMA, and VAR. The recipes will present practical techniques for handling non-stationary data, using power transforms, ACF and PACF plots, and decomposing time series data with multiple seasonal patterns. Later, you'll work with ML and DL models using TensorFlow and PyTorch. Finally, you'll learn how to evaluate, compare, optimize models, and more using the recipes covered in the book. What you will learn Understand what makes time series data different from other data Apply various imputation and interpolation strategies for missing data Implement different models for univariate and multivariate time

series Use different deep learning libraries such as TensorFlow, Keras, and PyTorch Plot interactive time series visualizations using hvPlot Explore state-space models and the unobserved components model (UCM) Detect anomalies using statistical and machine learning methods Forecast complex time series with multiple seasonal patterns Who this book is for This book is for data analysts, business analysts, data scientists, data engineers, or Python developers who want practical Python recipes for time series analysis and forecasting techniques. Fundamental knowledge of Python programming is required. Although having a basic math and statistics background will be beneficial, it is not necessary. Prior experience working with time series data to solve business problems will also help you to better utilize and apply the different recipes in

this book.

**EIB Working Paper
2021/01 – Towards a New
Growth Model in CESEE**

2021 The factors behind the pre-crisis growth model of the Central, Eastern and South-Eastern European EU countries (CESEE) region – skilled yet affordable labour force, foreign direct investment, imports of productivity-enhancing technology – are having less effect, but are yet to be substituted. This paper proposes a new growth model centred around a shift towards more home-grown innovation, digitalisation, climate change mitigation and a strong focus on skills, labour and social inclusion, to leave the middle-income trap behind for good and to boost economies' growth prospects in a post-COVID world. Based on analysis of firm-level data, it highlights the prerequisites of making this transition happen. Spes Christiana 2021-01

unprecedented advances in technology: facial and voice recognition, GPS tracking, supercomputer databases, intercepted cell phone conversations, the monitoring of app use, and millions of high-resolution security cameras make it nearly impossible for a Chinese citizen to hide anything from authorities. Commercial transactions, including food deliveries and online purchases, are fed into vast databases, along with everything from biometric information to social media activities to methods of birth control. Cameras (so advanced that they can locate a single person within a stadium crowd of 60,000) scan for faces and walking patterns to track each individual's movement. In some schools, children's facial expressions are monitored to make sure they are paying attention at the right times. In a new Social Credit System, each citizen is given a score

for good behavior; for those who rate poorly, punishments include being banned from flying or taking high-speed trains, exclusion from certain jobs, and preventing their children from attending better schools. And it gets worse: advanced surveillance has led to the imprisonment of more than a million Chinese citizens in western China alone, many held in draconian "reeducation" camps. This digital totalitarianism has been made possible not only with the help of Chinese private tech companies, but the complicity of Western governments and corporations eager to gain access to China's huge market. And while governments debate trade wars and tariffs, the Chinese Communist Party and its local partners are aggressively stepping up their efforts to export their surveillance technology abroad—including to the United States. We Have Been Harmonized is a terrifying portrait of

life under unprecedented government surveillance—and a dire warning about what could happen anywhere under the pretense of national security. "Terrifying. ... A warning call." —The Sunday Times (UK), a "Best Book of the Year so Far"

Lateness Peter Eisenman
2020-07-07 A provocative case for historical ambiguity in architecture by one of the field's leading theorists Conceptions of modernity in architecture are often expressed in the idea of the zeitgeist, or "spirit of the age," an attitude toward architectural form that is embedded in a belief in progressive time. Lateness explores how architecture can work against these linear currents in startling and compelling ways. In this incisive book, internationally renowned architect Peter Eisenman, with Elisa Iturbe, proposes a different perspective on form and time in architecture, one that

circumvents the temporal constraints on style that require it to be "of the times"—lateness. He focuses on three twentieth-century architects who exhibited the qualities of lateness in their designs: Adolf Loos, Aldo Rossi, and John Hejduk. Drawing on the critical theory of Theodor Adorno and his study of Beethoven's final works, Eisenman shows how the architecture of these canonical figures was temporally out of sync with conventions and expectations, and how lateness can serve as a form of release from the restraints of the moment. Bringing together architecture, music, and philosophy, and drawing on illuminating examples from the Renaissance and Baroque periods, Lateness demonstrates how today's architecture can use the concept of lateness to break free of stylistic limitations, expand architecture's critical capacity, and provide a

new mode of analysis.
**National Strategy for
the COVID-19 Response
and Pandemic**

Preparedness Joseph R. Biden, Jr. 2021-05-18
The ultimate guide for anyone wondering how President Joe Biden will respond to the COVID-19 pandemic—all his plans, goals, and executive orders in response to the coronavirus crisis. Shortly after being inaugurated as the 46th President of the United States, Joe Biden and his administration released this 200 page guide detailing his plans to respond to the coronavirus pandemic. The National Strategy for the COVID-19 Response and Pandemic Preparedness breaks down seven crucial goals of President Joe Biden's administration with regards to the coronavirus pandemic: 1. Restore trust with the American people. 2. Mount a safe, effective, and comprehensive vaccination campaign. 3. Mitigate spread through expanding masking, testing, data,

treatments, health care workforce, and clear public health standards. 4. Immediately expand emergency relief and exercise the Defense Production Act. 5. Safely reopen schools, businesses, and travel while protecting workers. 6. Protect those most at risk and advance equity, including across racial, ethnic and rural/urban lines. 7. Restore U.S. leadership globally and build better preparedness for future threats. Each of these goals are explained and detailed in the book, with evidence about the current circumstances and how we got here, as well as plans and concrete steps to achieve each goal. Also included is the full text of the many Executive Orders that will be issued by President Biden to achieve each of these goals. The National Strategy for the COVID-19 Response and Pandemic Preparedness is required reading for anyone interested in or

concerned about the COVID-19 pandemic and its effects on American society.

Stakeholder Capitalism

Klaus Schwab 2021-01-27
Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the

causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency: how countries

and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that

benefits us all.
Republic of Poland: 2021 Article IV Consultation-Press Release; Staff Report; and Statement by the Executive Director for the Republic of Poland International Monetary 2022-02-24 The Polish economy has rebounded strongly, with policy actions limiting the damage from the pandemic-induced recession by supporting employment and avoiding unnecessary bankruptcies. Dr. Carl L. Hart
2021-01-12 "Hart's
argument that we need to
drastically revise our
current view of illegal
drugs is both powerful
and timely . . . when it
comes to the legacy of
this country's war on
drugs, we should all
share his outrage." -The
New York Times Book
Review From one of the
world's foremost experts
on the subject, a
powerful argument that
the greatest damage from
drugs flows from their
being illegal, and a
hopeful reckoning with
the possibility of their
use as part of a
responsible and happy
life Dr. Carl L. Hart,
Ziff Professor at
Columbia University and
former chair of the
Department of
Psychology, is one of
the world's preeminent
experts on the effects
of so-called
recreational drugs on
the human mind and body.
Dr. Hart is open about
the fact that he uses
drugs himself, in a
happy balance with the
rest of his full and
productive life as a

researcher and
professor, husband,
father, and friend. In
Drug Use for Grown-Ups,
he draws on decades of
research and his own
personal experience to
argue definitively that
the criminalization and
demonization of drug
use--not drugs
themselves--have been a
tremendous scourge on
America, not least in
reinforcing this
country's enduring
structural racism. Dr.
Hart did not always have
this view. He came of
age in one of Miami's
most troubled
neighborhoods at a time
when many ills were
being laid at the door
of crack cocaine. His
initial work as a
researcher was aimed at
proving that drug use
caused bad outcomes. But
one problem kept
cropping up: the
evidence from his
research did not support
his hypothesis. From
inside the massively
well-funded research arm
of the American war on
drugs, he saw how the
facts did not support
the ideology. The truth

was dismissed and distorted in order to keep fear and outrage stoked, the funds rolling in, and Black and brown bodies behind bars. Drug Use for Grown-Ups will be controversial, to be sure: the propaganda war, Dr. Hart argues, has been tremendously effective. Imagine if the only subject of any discussion about driving automobiles was fatal car crashes. Drug Use for Grown-Ups offers a radically different vision: when used responsibly, drugs can enrich and enhance our lives. We have a long way to go, but the vital conversation this book will generate is an extraordinarily important step.

International Sales Law
Ingeborg Schwenzer
2012-10-26 Written for international trade lawyers, practitioners and students from common and civil law countries, this casebook is an excellent starting point for learning about the CISG, providing an article-by-article

analysis of the Convention. The commentary on each article is accompanied by extracts from cases and associated comparative materials, as well as references to important trade usages such as the INCOTERMS® 2010. The book features a selection of the most significant cases, each of which has been abridged to enable the reader to focus on its essential features and the relevant questions arising from it. The case extracts are accompanied by a comprehensive overview of parallel provisions in other international instruments, uniform projects and domestic laws. The analyses, cases, texts and questions are intended to aid readers in their comparative law and international sales law studies. They are designed to draw attention to the particular issues surrounding specific CISG provisions and to provoke careful consideration of

possible solutions. The book is a reference work as well as an introduction to the individual problem areas. In particular, it acts as a preparatory work for the Willem C Vis International Commercial Arbitration Moot. The inclusion of sample questions and answers also makes it particularly helpful for self-study purposes.

Exercised Daniel Lieberman 2021-01-05 If exercise is healthy (so good for you!), why do many people dislike or avoid it? These engaging stories and explanations will revolutionize the way you think about exercising—not to mention sitting, sleeping, sprinting, weight lifting, playing, fighting, walking, jogging, and even dancing. “Strikes a perfect balance of scholarship, wit, and enthusiasm.” —Bill Bryson, New York Times best-selling author of *The Body* • If we are born to walk and run, why do most of us take it easy whenever

possible? • Does running ruin your knees? • Should we do weights, cardio, or high-intensity training? • Is sitting really the new smoking? • Can you lose weight by walking? • And how do we make sense of the conflicting, anxiety-inducing information about rest, physical activity, and exercise with which we are bombarded? In this myth-busting book, Daniel Lieberman, professor of human evolutionary biology at Harvard University and a pioneering researcher on the evolution of human physical activity, tells the story of how we never evolved to exercise—to do voluntary physical activity for the sake of health. Using his own research and experiences throughout the world, Lieberman recounts without jargon how and why humans evolved to walk, run, dig, and do other necessary and rewarding physical activities while avoiding needless exertion. Exercised if

entertaining and enlightening but also constructive. As our increasingly sedentary lifestyles have contributed to skyrocketing rates of obesity and diseases such as diabetes, Lieberman audaciously argues that to become more active we need to do more than medicalize and commodify exercise. Drawing on insights from evolutionary biology and anthropology, Lieberman suggests how we can make exercise more enjoyable, rather than shaming and blaming people for avoiding it. He also tackles the question of whether you can exercise too much, even as he explains why exercise can reduce our vulnerability to the diseases mostly likely to make us sick and kill us.

Pivot Tables for everyone. From simple tables to Power-Pivot Olga Maria Stefania Cucaro
 2022-01-09 This work stems from the need to develop some Excel sheets to reach the required results. For example, in the workplace it often happens to have data that without a precise sorting or a filter or processing based on a certain field may seem unusable. Here are some features of the programs that process spreadsheets such as Excel from Office or Calc from OpenOffice or Calc from LibreOffice, as well as others, can be useful for achieving the result we want to obtain. In this volume

we will explain in a simple and effective way the usefulness of some important functions of the processing of spreadsheets and pivot tables that are essential for any work that focuses on data analysis. Today it is no longer possible to ignore the use of Excel or other software for processing spreadsheets for both business and leisure purposes. In this work we will dedicate ourselves to the processing of quantitative data for work purposes, taking into consideration various examples that will explain how to solve the problems proposed through subsequent steps that will lead to the solution of the same.

MLI Made Easy Kuldeep Sharma
 2021-04-22 The Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) provides an innovative approach to enable countries to swiftly modify their bilateral

tax treaties in order to implement measures developed in the course of the Base Erosion and Profit Shifting (BEPS) Project. MLI, the first successfully concluded multilateral tax treaty, provides jurisdictions with the tools they need to ensure that profits are taxed where economic activities generating the profits are performed, while at the same time giving businesses greater certainty. MLI Made Easy makes it easier to get a complete grasp of this swift but complex modification process of tax treaties. This first and only self-contained book offers an unmatched article-by-article discussion of the MLI with an abundance of practical examples, diagrams, and flowcharts to make the information easier to understand and apply. Focusing on measures to combat tax evasion and abuse of tax treaties arising due to artificial avoidance of a permanent establishment status, hybrid mismatch

arrangements, and other aspects of taxation, the book includes an in-depth discussion of the following and more: how specific gaps in existing bilateral tax treaties are addressed by the MLI; positions taken by selected jurisdictions and their impact on treaties; compatibility clauses, notification clauses, opting-in mechanisms, alternative provisions, and reservations; experiences in the course of implementation of the MLI; misconceptions and lingering doubts in respect of various substantive and procedural provisions of the MLI; interaction between the principal purpose test and simplified limitation on benefits; improving dispute resolution; and meaning of the phrases 'on or after', 'other taxes', and interpretational issues in entry into effect provisions. Adopted by a majority of jurisdictions worldwide, MLI preserves the tax

sovereignty of its Parties and has been successful in overcoming barriers to the conclusion of a worldwide multilateral tax treaty. Because this easy-to-use book immensely facilitates understanding and application of the treaty measures developed in the course of the BEPS Project, it will be of immeasurable use to practitioners and other professionals engaging in international taxation, as well as to taxation authorities and interested academics in any part of the world.

He's gonna be big. Little Badman, aka Humza Khan, has saved the world TWICE. So it's lucky when Humza and his friends narrowly avoid being hit by rock from outer-space. What does get hit is a box of delicious samosas, which turn . . . Radioactive! Now the trio have superpowers, which is pretty cool. What's less cool is the giant hamsters on the loose. Looks like a job for Little Badman and his crew.

The Once-Only Principle
Robert Krimmer
2021-07-02 This open access State-of-the-Art Survey describes and documents the developments and results

of the Once-Only Principle Project (TOOP). The Once-Only Principle (OOP) is part of the seven underlying principles of the eGovernment Action Plan 2016-2020. It aims to make the government more effective and to reduce administrative burdens by asking citizens and companies to provide certain standard information to the public authorities only once. The project was horizontal and policy-driven with the aim of showing that the implementation of OOP in a cross-border and cross-sector setting is feasible. The book summarizes the results of the project from policy, organizational, architectural, and technical points of view.
